

CENTRAL CALIFORNIA EMERGENCY MEDICAL SERVICES

A Division of the Fresno County Department of Public Health

Manual	Emergency Medical Services Administrative Policies and Procedures	Policy Number 401 Page 1 of 2
Subject	Emergency Medical Services Dispatch Center Requirements	
References	Health and Safety Code, Division 2.5, Section 1797.220 California Code of Regulations – Title 13	Effective: 10/01/86

I. POLICY

The Emergency Medical Services (EMS) Agency shall authorize and designate a single centralized EMS dispatch center for each county for the receipt and handling of emergency medical service requests in Fresno, Kings, Madera and Tulare Counties. Only those entities having an agreement and designation by the EMS Agency shall engage in Emergency Medical Dispatch of ambulances.

A. Designated EMS Dispatch Centers

The following EMS dispatch centers have been designated by the EMS Agency:

1. County of Fresno - Fresno County EMS Communications Center
2. County of Kings - Fresno County EMS Communications Center
3. County of Madera - Fresno County EMS Communications Center
4. County of Tulare - Tulare County Consolidated Ambulance Dispatch (TCCAD)

B. Centralized Ambulance Dispatch

The EMS Agency has designated a single EMS dispatch center for each county to function as the centralized EMS dispatch center for the receipt of all EMS 9-1-1 calls and medical requests, and for the primary dispatch of ambulances. The EMS Agency's designation of a single and centralized EMS dispatch center for each County is the EMS system's approach for the most efficient provision of emergency medical services through the use of pre-arrival medical care instructions, priority dispatch, the immediate notification of first responders, and dispatch of ambulances. The designated EMS dispatch center for each county will be the only entity to receive medical 9-1-1 calls from primary public safety answering points (PSAP).

C. Emergency Medical Dispatch

Emergency Medical Dispatch is the practice of utilizing trained and certified personnel to dispatch appropriate levels of response to emergency medical incidents in accordance with pre-established EMS policies and procedures. Designated EMS dispatch centers shall use and maintain the National Academy Emergency Medical Dispatch Protocols, which includes the Medical Priority Dispatch System and pre-arrival care instructions. Attachment A includes a listing of the approved priorities and assessment level for each dispatch determinant.

Approved By EMS Director	DANIEL J. LYNCH (Signature on File at EMS Agency)	Revision 03/03/2022
EMS Medical Director	JIM ANDREWS, M.D. (Signature on File at EMS Agency)	

Subject:	EMS Communications Center Staffing Requirements	Policy Number: 401
----------	---	-----------------------

D. EMS Dispatch Center Requirements

1. Designated EMS dispatch centers shall provide, at a minimum, the following services using approved protocols:
 - a. Caller interrogation
 - b. Call prioritization of ambulance and first responder resources
 - c. Provision of pre-arrival care instructions
 - d. Dispatch of ambulance and first responder resources

2. Staffing Requirements

EMS dispatch centers shall provide appropriate staffing in order to provide efficient processing of EMS requests in accordance with EMS Agency policy and procedure. EMS dispatch personnel who have responsibility for the receipt of an EMS request, shall be a certified EMS Dispatcher. A certified EMS Dispatcher shall be defined as a person who meets all requirements of the EMS Agency Policy and Procedure.

3. Designated EMS dispatch centers shall be recognized by the State of California as a secondary PSAP and provide for and maintain dispatch and data management systems. Data collected by each EMS dispatch center shall provide for the following data points, which includes information required by Title 13 of the California Code of Regulations, Section 1100.7. This shall include all requests for ambulance services including non-emergency responses, referrals to other provider agencies, canceled runs, and special event stand-bys.

EMS dispatch center data for each individual response shall include but not be limited to:

- a. Date call received;
 - b. Time call received (time of telephone pickup)
 - c. Name of requesting person or agency;
 - d. Time unit(s) alerted;
 - e. Time unit(s) enroute;
 - f. Time unit(s) on-scene;
 - g. Time unit(s) depart scene;
 - h. Time unit(s) arrive destination;
 - i. Time unit(s) in-service/available;
 - j. Location of incident;
 - k. Nature of incident;
 - l. Names of responding personnel;
 - m. Identification of unit(s) sent;
 - n. Mode of response and any change in response mode (time shall be noted);
 - o. Destination of transporting unit(s);
 - p. Mode of transport and any change in transport mode (time shall be noted);
 - q. Number of patients transported;
 - r. Disposition of non-transporting unit(s) (if canceled, include reason and by whom);
 - s. Reasons for delays (if applicable);
 - t. Name of person receiving the call.
 - u. Name of person dispatching the call
4. EMS dispatch centers shall make and retain a recording of all telephone lines and radio communications frequencies utilized to receive, coordinate, and dispatch requests for ambulance, first responders and all medical services. The recordings shall be retained for a minimum of one hundred eighty (180) days.
 5. All information pertinent to any EMS request shall be routinely made available to the local EMS Agency upon request.

The CCEMSA Medical Director has determined the appropriate response and assessment level (ALS versus BLS) for each dispatch problem nature. If the dispatch problem nature requires an ALS assessment based on the patient's reported condition at the time of dispatch, and if the provider agency for the zone in question offers paramedic services, a paramedic ambulance shall be dispatched on this call for the provision of an advanced life support assessment.
