Good morning,

This was received by District 1 regarding the Redistricting item for today's meeting.

A hard copy will be placed on the Dais.

Thank you,

Lisa

CAUTION!!! - EXTERNAL EMAIL - THINK BEFORE YOU CLICK

Good evening Rep. Pacheco,

Hope this correspondence finds you well.

As a concerned resident, parent, community volunteer, current reside of Kerman and employee of Fresno; I have had the pleasure of working and living in some very small, tight knight, yet under resourced rural areas such as Tranquillity, and more fully resourced communities such as Kerman, as well as certain areas of Fresno.

As I have lived and worked in various areas within District 1, some which happen to be among the most economically challenged and politically neglected areas of W/SW/SE Fresno, and the country. Regardless of these circumstances, these communities and the people living within them remain warm, resilient and steadfast.

It is worthy to note many of these communities experience such a vast disparity of resources, having a historically negative net impact upon the health and quality of life of those residents living and working within these neighborhoods; resulting in a life expectancy of twenty years less when compared to our neighbors to the north.

This is due to less investment and available resources allocated to these communities to address the overall health (i.e,

lack of access to healthcare-not to mention affordable healthcare), educational opportunities, green spaces, potable water, as well as corporate pollution due to oil extraction, and commercial processing plants which operate near homes and schools. Therefore, exposing residents of these under represented and vulnerable communities to avoidable health hazards; as compared to individuals who reside just a few blocks away, who more often than not, are provided more and greater resources and protections with greater frequency and urgency. Resulting in more and adequate representation, leadership with regard to addressing the needs of their respective residents, often it seems, at the expense of our working families living in rural communities.

Please keep District 1 whole, to allow for the adequate distribution, allocation and organization of resources and protections in order to ensure all voters, and community members are adequately represented in accordance the recommendations regarding the equity map.

Thank you for your time and consideration regarding this very important matter.

Sincerely,
Elisabeth Robledo
District 1 resident
