

JUVENILE JUSTICE REALIGNMENT BLOCK GRANT ANNUAL PLAN

MAIN CONTACT FOR PLAN

Date: Click or tap here to enter text.

County Name: The County of Fresno

Contact Name: David Ruiz

Telephone Number: 559-600-4984

E-mail Address: ddruiz@fresnocountyca.gov

BACKGROUND AND INSTRUCTIONS:

Welfare & Institutions Code Section(s) 1990-1995 establish the Juvenile Justice Realignment Block Grant program for the purpose of providing county-based care, custody, and supervision of youth who are realigned from the state Division of Juvenile Justice or who would otherwise be eligible for commitment to the Division of Juvenile Justice prior to its closure. Section 1995 was amended by Assembly Bill 505 (Ting, Chapter 528, Statutes of 2023.) This template has been updated to reflect those amendments that took effect on January 1, 2024. All citations refer to the law as amended. The statutory language can be found [here](#).

To be eligible for funding allocations associated with this grant program, counties shall create a subcommittee of the multiagency juvenile justice coordinating council to develop a plan describing the facilities, programs, placements, services, supervision, and reentry strategies that are needed to provide appropriate rehabilitative services for realigned youth. (Welf. & Inst. Code § 1995(a).)

County plans are to be submitted to the Office of Youth and Community Restoration (OYCR) in accordance with Welf. & Inst. Code §1995. OYCR may request revisions as necessary or request completion of the required planning process prior to final acceptance of the plan. (Welf. & Inst. Code § 1995 (f).) Plans will be posted to the OYCR website. (Welf. & Inst. Code § 1995(g).)

There are nine sections to the plan:

- Part 1: Subcommittee Composition
- Part 2: Target Population
- Part 3: Programs and Services
- Part 4: Juvenile Justice Realignment Block Grant Funds
- Part 5: Facility Plan

- Part 6: Retaining the Target Population in the Juvenile Justice System
- Part 7: Regional Efforts
- Part 8: Data
- Part 9: Other Updates

PART 1: SUBCOMMITTEE COMPOSITION AND PROCESS (WELF. & INST. CODE §§ 1995 (B) AND (C))

List the subcommittee members, agency affiliation where applicable, and contact information:

Agency	Name and Title	Email	Phone Number
Chief Probation Officer (Chair)	Kirk Haynes, Chief Probation Officer (Chair)	khaynes@fresnocountyca.gov	(559) 600-1298
Public Defender's Representative (Co-Chair)	JoAnna Edwards, Chief Defense Attorney	jedwards@fresnocountyca.gov	(559) 600-1560
District Attorney's Office Representative	Galen Rutiaga	grutiaga@fresnocountyca.gov	(559) 600-5188
Department of Social Services Representative	Sanja Bugay	Sbugay@fresnocountyca.gov	(559) 600-2301
Department of Mental Health	Emma Rasmussen	erasmussen@fresnocountyca.gov	(559) 600-9192
Office of Education Representative	Joe Hammond	jhammond@fcoe.org	(559) 600-4934
Court Representative	The Honorable Judge Leanne Le Mon	llemon@fresno.courts.ca.gov	(559) 457-6407
Department of Public Health	John Zweifler	jzweifler@fresnocountyca.gov	(559) 779-4277
Three Community Members (<i>defined as "individuals who have experience providing community-based youth services, youth justice advocates with expertise and knowledge of the juvenile justice system, or have been directly involved in the juvenile justice system"</i> (Welf. & Inst. Code § 1995(b).))	Sergio Coronel	sergiocoronel2690@gmail.com	(559) 257-7471
	Ruben Espinoza	espinoza23ruben@gmail.com	(559) 389-3415
	Joanna Litchenberg	joannaz@focusforward.org	(559) 600-4961
Additional Subcommittee Participants			
GEO Group	Angel Duarte	anduarte@geogroup.com	(559) 454-0012
National Alliance on Mental Illness Fresno	Amy Parks	amy@namifresno.org	(559) 224-2469

Rising Star Baptist Church	Booker Lewis, Pastor	booker.lewis@fresno.gov	(559) 577-2656
Wellpath	Dulces Gonzalez	Dulces.Gonzalez@wellpath.us	(559) 600-4837
Community Justice Center	Sheri Wiedenhoefer	sheri@communityjusticecenter.com	(559) 878-5105
Breaking The Chains	Dominique Brown	dbrown@bctfresno.org	(559) 492-1566

Describe the process used to determine whether to select a co-chair for your subcommittee (Welf. & Inst. Code § 1995(b)):

At the January 25, 2024 subcommittee meeting, Chief Kirk Haynes announced the changes in AB 505. Chief Haynes asked committee members for input. Public Defender representative JoAnna Edwards suggested Deputy Director of Behavioral Health, Emma Rasmussen, for the co-chair nomination as a possibility. It was decided that the co-chair would be voted on at the next meeting.

On February 15, 2024, the notice for the February 22, 2024 Realignment Subcommittee meeting went out to the public and was publicly posted. Item 2 on the Agenda was “JJCC Realignment Subcommittee Co-Chair discussion, nomination of Co-Chair, and Vote for Co-Chair.

During the February 22, 2024, meeting, Sheri Wiedenhoefer nominated JoAnna Edwards for the Co-Chair position, and Ms. Edwards accepted. No other nominations were put forth. A vote was held. JoAnna Edwards was voted in as Co-Chair for a term of 2 years.

Provide the dates of the last two meetings that the subcommittee convened to discuss your county’s JIRBG plan?

Meeting Date 1:

Meeting Date 2:

Additional meeting dates of the committee, if applicable: 04/02/2024, 04/08/2024, 04/25/2024, 07/25/2024, 10/24/2024, additional meetings to be added as needed.

Date that the subcommittee approved the plan by a majority vote. 04/08/2024

Describe how the plan was developed, including the review and participation of the subcommittee community members as defined in Welf. & Inst. Code § 1995(b):

The recommendation from committee was to schedule 2-3 hour working group meetings to focus specifically on the annual block grant plan. It was identified that not all members of the Subcommittee were active participants in the previous year, and the Subcommittee roster needed to be updated to include members who were invested in this work who could (and would) provide relevant feedback.

For the Subcommittee members to provide meaningful feedback and have an accurate foundation for plan development, it was recommended that Fresno County Probation Department (Probation) provide updated information and hard data regarding what aspects of the previous plan have been implemented. The Subcommittee created a plan development schedule, with targeted dates regarding when feedback would be submitted and turned around for review. First, Subcommittee members were provided the previous plan, data regarding its implementation, and Probation proposed edits for this year. Next, Subcommittee members

reviewed the information and submitted their individual feedback. The received feedback was then distributed to Subcommittee members for review prior to the April 2, 2024, meeting. On April 2, 2024, the Subcommittee met to review all submitted feedback and develop the updated plan. On April 8, 2024, the Subcommittee members met to vote and approve the final plan.

PART 2: TARGET POPULATION (WELF. & INST. CODE § 1995(D)(1))

Briefly describe the County's realignment target population supported by the block grant.

The "target population" is defined as "youth who were eligible for commitment to the Division of Juvenile Justice prior to its closure and shall further be defined as persons who are adjudicated to be a ward of the juvenile court based on an offense described in subdivision (b) of Section 707 or an offense described in Section 290.008 of the Penal Code." (Welf. & Inst. Code § 1990(b))

Under Senate Bill (SB) 823, Fresno County has developed a plan to safely and securely meet the needs of youth previously committed to the Department of Juvenile Justice (DJJ), and youth committed to Secure Youth Treatment Facility (SYTF) subsequent to DJJ's closure. This approach requires knowledge of previous DJJ commitments, as well as youth with 707(b) offenses who were not committed to DJJ to fully understand the needs of youth in similar situations. Youth whose offenses occurred after DJJ's closure must be 14 years or older at the time of the offense to qualify for a commitment to SYTF, and the Court must make a finding that no less restrictive alternative is appropriate for rehabilitation. The youth served will be some of the county's highest need youth.

Demographics of identified target population, including anticipated numbers of youth served, disaggregated by factors including age, gender, race or ethnicity, and offense/offense history.

January 2023 to January 2024

Zip code/neighborhood

93702/93706/93726/93725/93722/93727 Southeast Fresno (17)

93701/93718/93704/93705/93703 - Central Fresno (6)

93710/93720 Northeast Fresno – (2)

93618 – Dinuba – 1

93234 – Huron (1)

95341 – Merced – 1

Placement/foster youth - (1)

Race

Hispanic/Latin/Mexican – 17 (3 released)

Black – 10 (4 released)

White – 1

Asian – 1

Gender

Male – 28

Female – 1

29 youth – 7 released

Ages 15-22 years

Offenses

Attempted murder – 2
Assault with a firearm – 5
Assault with a deadly weapon – 2
Murder – 9
Voluntary manslaughter – 3
Involuntary manslaughter - 1
Shooting from a vehicle – 1
Robbery – 5
Burglary – 1

Describe the target population, disaggregated by programs, placements and/or facilities to which they have been referred.

January 2023 to January 2024
Graduates from Alice Worsley High school – 11
Currently enrolled in Alice Worsley High school – 6
Enrolled in Fresno City College courses – 10
Dual enrollment courses in FCC/Alice Worsley – 13
Enrolled in ROP welding – 11
Enrolled in ROP horticulture – 8

Focus Forward

Family sessions enrolled– 6
Family sessions completed – 4. All 4 youth participated in a 12-week (12-session) series of classes as a group. The first hour of each session parents meet as a group and the youth meet as a group. Both groups come together for the remainder of the session and learn and work together.
Just Beginnings enrolled – 6
EBP Money Habitudes – 5
Writing program – 4

Cognitive Behavioral Intervention Courses

Free your mind core curriculum completed – 13
Free your mind advanced practice completed – 5
Aggression replacement training completed – 24
Substance Use completed – 23

PART 3: PROGRAMS AND SERVICES (WELF. & INST. CODE §1995(D)(2))

Provide a description of the facilities, programs, placements, services and service providers, supervision, and other responses that will be provided to the target population. Describe any progress on this element since May 1, 2023, at the end of your response (Welf. & Inst. Code §1995(D)(2) and (d)(8)):

The intent of SB 823 is congruent with work Probation has undertaken in recent years to address the needs of higher risk youth through a youth development model. This includes the adoption of a validated risk assessment tool, collaboration with community-based agencies, and a partnership with the University of Cincinnati (UC) to plan and implement evidence-based practices. Additionally, the Realignment Subcommittee is committed to meeting throughout the implementation of the plan to monitor and evaluate the services

identified, and the data necessary to be collected to inform targeted modifications of the plan. At the forefront of these efforts is the utilization of evidence-based practices with the desired outcome of reducing recidivism and improving youth outcomes by strengthening community supports and family ties. Probation has created the foundation to prepare to receive these higher risk youth at the Juvenile Justice Campus (JJC) and is eager to expand these capabilities in the required continuum of care to better prepare these youth to transition into the community during their commitments. To this end, Probation has partnered with the UC to redesign services using a multidisciplinary team approach to respond to youth behavior and utilize Core Correctional Practices (CCP) to reduce misconducts and lower recidivism. This program model continues to provide a viable way to maintain the safety and security of the facility, and reduces the need for more restrictive confinement. This basis will be enhanced by the adoption of a more comprehensive approach for staff use of verbal de-escalation and least restrictive means to manage behavior on the units.

The implementation of evidence-based programming will include several curricula designed to target motivation, address needs, and encourage development of prosocial skills, and healing. This will be delivered by a combination of internal and community-based providers, using an approach that is responsive to the needs of the population. Specialized services to support the unique needs of youth with disabilities including mental health, learning challenges, or trauma-based concerns will be addressed through a comprehensive Individualized Rehabilitation Plan (IRP) developed by a multi-disciplinary team. This model of review and support will include input from youth, their family and loved ones, and mentors that will prove vital to a successful transfer to the community as the youth progress through their time in county care. This continuum of care represents a commitment to work with youth as they have struggles and seek to address unmet needs that pose barriers to their reentry success. This model will incorporate these mentors with lived experience with incarceration and rehabilitation into all phases of youth's progress through intake, program time, and the reentry process. The Realignment Subcommittee recognizes the importance of connecting the youth to credible messengers and reentry specialists at the earliest point possible in their system involvement in order to maximize each youth's positive ties to the community.

Likewise, Probation has invested in enhancing the approach used in juvenile field services, through the implementation of CCP in the field Effective Practices In Community Supervision (EPICS), a system of incentives and responses, and an internal coaching system for Continuous Quality Improvement (CQI). Additional initiatives are planned to further develop the capacity for continuous quality improvement and ongoing evaluation of community-based organizations. Probation is positioned to fulfill the purpose of SB 823 to produce better outcomes by working together with youth to strengthen safe, healthy, and more positive connections with families and communities. Furthermore, there is energy in the community, with the assemblage of the Subcommittee, to provide for an age-appropriate service that supports youth development from admission through a phased-approach step-down process of reentry into the community. Wherever possible, reentry services will be coordinated with CalAIM Justice Involved pre-release services which will be offered to all youth in the 90 day pre-release period.

Core to the Realignment Plan is the implementation of a credible messenger mentor model. The purpose of incorporating credible messengers is to minimize institutionalization and maximize positive ties to the community. According to the Credible Messenger Justice Center, Credible Messengers have been formerly incarcerated or justice-involved and have had a meaningful transformation in turning their lives around. They have demonstrated integrity and want to help others heal while continuing their own healing. Credible Messengers come from the same community and background as justice-involved youth, and understand what life is like in those neighborhoods. In order to successfully prepare youth for safe and successful community reintegration, they have to develop trusting, positive ties within the community. When agreed upon by the youth, mentors will be a stakeholder on the Multidisciplinary Team, inside the facility on a regular basis, and will be supported in building authentic, trusting, confidential relationships with youth in custody. The Subcommittee understands that correctional models, by themselves, are less effective for youth treatment and

healing. Agencies providing credible messenger mentors have been approved and are providing in-custody programming.

The community-based organizations stand poised to support this population through educational, vocational, and supportive services. There are several agencies that are invested in providing mentoring, advocacy, and restorative justice opportunities for youth to assist them not only in the transition to the community and a prosocial lifestyle, but prior to entry to the juvenile justice system as well. These learning activities will begin while the youth are in custody and will continue upon discharge to their home or step-down to a less restrictive placement. For those youth returning to their home in other jurisdictions, a comprehensive reentry plan will be developed in coordination with their home county to provide relevant and essential supports as they transition out of Fresno County.

This proposal provides details regarding physical plan considerations, safety and security safeguards, and the continuum of services needed. This program is intended to reduce the risk for future criminal justice system involvement, and to strengthen bonds with social supports and loved ones in the community. While maintaining a trauma-informed approach, the program must meet the treatment needs of this diverse target population including, but not limited to: antisocial behavior, social skill and emotion regulation deficits, problems with family and peer relationships, gang affiliation, substance misuse, mental health issues, self-harm, poor academic performance, aggression and violence, community violence, and poverty. As such, the program has the potential to serve as an important resource for communities in and around Fresno County.

The length of time serving an SYTF commitment is projected to be approximately two to four years, with an age of release around 20 years old in some cases. The initial phase of the program will involve the delivery of structured interventions and services in a more secure, carceral setting (most likely as a stand-alone unit within two units in the Commitment facility on the JJC). As youth progress toward the goals outlined in their IRP and ready to “step down” to a less restrictive placement (LRP), the program includes a step-down approach that incorporates a significant commitment to reentry services and community partnerships. Furthermore, transitional services may include an option for independent living to help youth maintain the benefits of programming, especially if they do not have adequate family support and/or housing accommodations post-release.

The specific program elements to be designed and/or adapted for the purposes of this project include: the assessment protocol, case management practices, treatment materials, adjunctive interventions, and reentry services. The goal is to create a blueprint for the program to cover the entire process from intake through discharge and community aftercare. In addition, continuous quality improvement measures will be created to ensure that Probation and selected providers are fully equipped to sustain the program into the future. All program elements will incorporate evidence-based practices with a youth development lens, and structured interventions will be based on a cognitive-behavioral model. Furthermore, the key concepts of youth development will inform the design of materials.

In order to undertake this work in a systematic way, separate Multidisciplinary Implementation Teams were established to complete specific tasks and deliverables in five substantive areas: (1) intake protocol, assessment and case management practices; (2) the behavior management system and physical design of the unit; (3) structured treatment interventions and programming schedules; (4) the continuous quality improvement plan; and (5) SYTF monthly review for reentry and/or stepdown. UC key personnel provided the structure, technical assistance, templates, and other materials to support and guide the work of these committees. Implementation plans will be developed to guide action steps as the program is established and enhanced.

SYTF 30-day Multi Disciplinary Team (MDT) Individual Rehabilitation Plan meeting:

- When youth are dispositioned, an SYTF Deputy Probation Officer (DPO) will meet with them within one day of their disposition hearing.
- For every newly committed SYTF youth, an e-mail is sent out to the MDT team advising them of the new youth that was committed to SYTF for the 30-day review hearing per WIC 875(d)(1):
 - Focus Forward Reentry case manager/social worker/family services coordinator
 - Wellpath- Rick Virk, Lead Mental Health Supervisor
 - Alice Worsley- Nick Moreno, Guidance Learning Specialist/Joe Hammond Principal
 - Loto Ministries- Maria/Loto
 - Supervising Juvenile Correctional Officer (SJCO) and Senior Juvenile Correctional Officer (Sr.JCO)
 - Social worker Ulysses Uribe
 - GEO – Caroline Riojas, Cognitive Behavioral Intervention instructor
 - SERI -Mary Oganessian, PsyD services coordinator
 - Circles of Support and Accountability (COSA)
 - The Counseling and Psychotherapy Center (CPC)
- Provide the name of the youth, commitment date, DOB, and the 30-day review hearing set by the Court to review and adopt the proposed IRP.
 - They are advised a calendar invite meeting invite will be sent out to give the collaborative agencies involved, the time to complete their initial assessments, which will be discussed at the meeting.
 - Contact the parent/supportive adult to contribute to youth's plan via facetime/phone.
 - For those agencies who cannot make the meeting, a summary of their assessment is provided to the DPO. DPO relays this information to the MDT team on their behalf.
 - Social Work Practitioner completes PACT assessment with youth.
 - The Youth's Counsel should be contacted and invited to the MDT meeting to develop the IRP.
- At the MDT meeting, everyone is provided the opportunity to discuss their assessment.
- Identify the youth's needs in relation to treatment, education, and development, including health, mental or emotional health, disabilities, or gender-related or other special needs. This includes identifying reentry needs and barriers.
- Describe the programming, treatment, and education to be provided to the youth in relation to the identified needs during the commitment period.
- The family is given the opportunity to provide input regarding the needs of the youth via facetime/phone. The opinions of the youth and the youth's family is included in the rehabilitation plan report to the court.
- Lastly the youth joins the meeting and is asked how they are adjusting to the program, what they like, what they would like to see added (program, services, etc.), where they plan to live upon release, and any further questions from the agencies. The youth is also reminded of their 30-day review hearing and what to expect.
- Youth leaves, and the MDT team adds any other information to the meeting.
- This information is used for the youth's 30-day review hearing/individual rehabilitation plan per WIC 875(d)(2).

Monthly SYTF Progress Review meeting:

- A monthly calendar invite meeting invite is sent for the 2nd and 4th Wednesday of every month to the collaborative agencies involved with the day, time, and location of the meeting.
- At this meeting, we discuss the progress towards rehabilitation goals of all youth in SYTF since last month's meeting and any issues related to services or family. Round table for each agency to provide their information.
- No youth are at this meeting however results of the meeting will be communicated to youth individually.
- This meeting may include any other collaborative partner who may be working with the youth (case by case basis).

SYTF 6-month SYTF Review meeting

- Calendar meeting invite sent out (with at least a week's notice) indicating the day, time, and location of the meeting.
- At the meeting, everyone is provided the opportunity to discuss their assessment.
- Parent/supportive adult contacted prior to the meeting to contribute to the youth's plan in person or via facetime/phone.
- The youth joins the meeting and is asked how they are adjusting to the program, what they like, what they would like to see added (program, services, etc.), where they plan to live upon release, and any further questions from the agencies. The youth is also reminded of their 6-month review hearing and what to expect.
- Meeting concludes, this information is used to update 6-month review hearing reports.
- School/CBI/Unit points are calculated to determine the amount of time earned towards a baseline confinement term reduction per WIC 875(e)(1).
- If the youth has failed to make substantial progress towards their IRP goals or reentry, up to one additional year of confinement may be added after a hearing and court finding that the youth constitutes a substantial risk of imminent harm to others in the community if released from custody, per WIC 875(e)(3).
- Recommendations may be made by Probation for a less restrictive program, if any, to facilitate reintegration per WIC 875(f)(1), as appropriate based on the youth's progress toward their IRP goals.

When meeting with youth in the unit:

- DPO discusses behavior and progress in the program
- Addresses any questions or concerns the youth may have
- School progress/college plans
- Future goals
- Issues in the unit
- Transition/Reentry plans
- Housing
- Employment
- Counseling

- Schooling
- Bank accounts/money management
- Healthy Choices
- Identification – ID/SSC/BC
- General relief/medical etc.

90 Day Pre-release Meeting

- Review post-release CalAIM resources
- Coordinate warm handoff to Enhanced Case Management (ECM) provider to facilitate post-release services
- Conduct pre-release survey regarding reentry services provided while in JJC

SYTF Discharge hearings WIC 875(e)(3):

- A transition meeting is conducted with collaborative agencies, parent/guardians, and the youth to speak about the plans upon release as well as visitation by DPO's and appointments.
- A report is written to the Court upon the youth's completion of their baseline commitment term or adjusted term and the youth is placed on Secure Track Supervision (STS) until Further Order of the Court (FOC). Terms and conditions of STS are attached to the discharge report.

STS violations of Probation:

- If the youth violates the orders of STS they are returned to JJC to serve either the remainder of the baseline term or 6 months whichever is longer not to exceed MPC, per WIC 875(e)(4).

The County Juvenile Justice Realignment Subcommittee will collaborate with the UC to create a logic model as a starting point for the program design.

As the project shifts into the program design phase, assessments and structured treatment interventions are implemented to match the criminogenic needs – or dynamic risk factors – of the target population to be served by the program. Probation utilizes the Positive Achievement Change Tool (PACT 2020) and the Static Risk Offender Needs Guide – Revised (STRONG-R) to identify risk and need factors. These assessments will continue to serve as the foundation for evidence-based decision-making. Additional assessments will be selected to provide more detailed information about criminogenic need domains and specific responsivity factors.

Other program elements will then be designed around this core. This will include the schedule for programming and activities, contingency management (or behavior management) system, case management plans, as well as other program documents such as progress ratings and program fidelity measures. Careful attention will be paid to contextual factors (including the physical layout of the program, staff ratios, etc.) to ensure that the program can be implemented as designed.

In the second phase of the project, UC key personnel developed a list of staff training modules, the course sequence, and a proposed schedule. If appropriate, UC key personnel will identify the trainings that particular staff should attend by job position description. A partial listing of training topics includes:

- PACT 2020 and STRONG-R Assessment Training
- Behavioral Interventions to Reduce Institutional Misconducts and Recidivism
- Case Planning (how to create an Individualized Rehabilitation Plan)
- Free Your Mind Facilitator Training
- I Decide Curriculum
- Juvenile Sex Offender Risk Assessment Training (J-SOAP, ERASER or PROFESOR)

- CCP Interactions
- EPICS Refresher
- CCP and EPICS Training-of-Trainers
- Crisis De-escalation and Physical Management
- Crisis Intervention Team (CIT)
- Positive Action
- Family Systems Trauma Model

These trainings are delivered by UC, Vant4ge, and other contracted agencies. Both Probation personnel and staff from community-based organizations will be trained as appropriate to the topic and their program delivery role. A more detailed plan of the utilization of community-based organizations is included in other categories within this document.

As program elements are implemented, formal pilot periods are established to address any logistical issues. Coaching will involve hands-on modeling of skills associated with service delivery, as well as observation with feedback. At this stage, virtual meetings can also be used for ongoing consultation on program implementation. At the end of this phase, attention will shift from implementation to continuous quality improvement in order to equip the program with the skills and resources needed to sustain the model over time.

Staff members will be trained on the use of group observation forms, client satisfaction surveys, and staff evaluations for the purposes of quality improvement. Probation is in the process of implementing a comprehensive CQI plan that will be overseen by an Executive Committee and led by the Probation Quality Control/Program Evaluation/Training Officers Unit.

In January 2024, GEO Group was given approval to implement addition curriculums to implement with the SYTF Youth. These curriculums will be implemented until trainings can be resumed for Aggression Replacement Training and Free Your Mind through UC. These curriculums include:

Phoenix New Freedom Managing Aggression and Violence, a skills-based 50-hour program designed to address key issues in aggression and violence. Each lesson is supported by a session opener from the What Do You Think? series, a subtle approach to cognitive restructuring (CBT) that includes issues relating to aggression, violence, risk and protective factors, substance abuse, victim empathy, and moral dilemmas. The program includes an ample supply of What Do You Think? scenarios so that each individual instructor may choose ones that best reflect his or her specific group of participants.

R1 Learning curriculum is grounded in proven behavioral health models, adapted from the work of the original authors and experts and supported by research. The central tools of the system, the Discovery Cards, provide a hands-on, concrete approach that enables both practitioners and clients to learn and apply these theories to real-life situations and circumstances. R1's tools are effective and easily adapted for different populations and settings and by practitioners at all levels of knowledge, skill, and experience. By combining the most effective content with a structure for effective implementation, R1 fosters greater engagement with treatment, counseling, and coaching —empowering individuals to live a healthier life and reach their full potential. Discovery Cards topics include; Emotional Triggers, Stages of Changes, Values, and others.

PART 4: JUVENILE JUSTICE REALIGNMENT BLOCK GRANT FUNDS (WELF. & INST. CODE §1995(D)(3))

Describe how the County plans to apply grant funds to address the mental health, sex offender treatment, or related behavioral or trauma-based needs of the target population. Describe any progress

on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code §1995(d)(3)(A) and (d)(8))

Mental Health

Since May 1, 2023, the Department of Behavior Health (DBH) now provides a certified Crisis Stabilization Center and field-based mobile crisis response in the community. Representatives from supporting organizations will be involved in a multidimensional team for those youth who present with consistent behavioral issues or evidence of a disability that may pose a barrier to their academic, social, or program success.

Wellpath, DBH and additional community providers are all available to provide mental health services for youth in the community such as assessment, psychiatry, therapy, case management, and supportive services. The County will coordinate warm handoffs to community organizations that can support the reentry goals of this program in conjunction with CalAIM JI 90 day pre-release services. These providers all deliver services congruent with a trauma-informed model.

NAMI, the National Alliance on Mental Illness, is the nation's largest grassroots organization providing education, support and advocacy for all people living with mental health challenges for over 40 years. NAMI Fresno, the local affiliate, provides education classes, presentations, and support groups for both individuals and family members of those living with mental health challenges. These programs are available to community members at no cost and always from a lived experience perspective. Programs such as NAMI Ending the Silence, NAMI Connection Recovery Support Group, and NAMI Peer to Peer are some of the opportunities from this community benefit organization that support youth, young adults and their families.

Focus Forward is experienced in providing evidence-based parenting education for youth and their parents/caregivers designed to repair abusive parent-teen relationships. Parents and their teens attend separate groups concurrently, and then join as one group for 90 minutes. Parents and teens role-play, discuss, draw, and learn how to live with each other, how to play together, how to communicate respectfully, and how to be a positive and nurturing family. Collaterally, Focus Forward also connects youth with adult mentors to provide a social support system for the youth while in custody and during their transition into the community. To respond to the needs of the SYTF population, a greater focus in recruitment for mentors has been with adults with lived experience-through partnership with Project Rebound and Impact Justice for their California Justice Leaders AmeriCorps Members and an intentional handoff to community support networks.

A trauma-informed approach is required when working with this population. Probation and Fresno County Superintendent of Schools (FCSS) have provided staff with training to raise awareness to the prevalence of trauma with the youth in their care, as well as approaches to reduce provocation of trauma-responses. The selected programming is designed to support the use of effective emotional regulation and coping strategies to reduce impulsivity, aggression, and social isolation.

Problematic Sexual Behavior Treatment

Probation is committed to providing programming for youth with problematic sexual behaviors informed by the individual treatment needs of youth in custody and in the community. Probation is interested in securing capacity to assess those youth adjudicated with a sexual offense using a tool that will provide guidance in the formation of a treatment plan. Options include the Juvenile Sex Offender Assessment Protocol-II(J-SOAP-II), Estimate of Risk of Adolescent Sexual Offense Recidivism (ERASOR), or Protective + Risk Observations For Eliminating Sexual Offense Recidivism (PROFESOR). With adequate assessment information, a portion of the Individualized Rehabilitation Plan will be developed and include participation in the I Decide curriculum.

I Decide curriculum is intended to target sexually maladaptive behavior in moderate to higher risk youth. It is designed to: (1) promote healthy sexual attitudes and behavior; (2) encourage youth to take responsibility for behaviors; (3) identify and replace risky thinking; (4) learn to manage emotions; (5) develop the ability to take the perspective of others; (6) build social skills to strengthen relationships; (7) support the formation of a positive identity; and (8) strengthen bonds with family members. The session materials are based on a cognitive-behavioral treatment model, and also incorporate motivational engagement, mindfulness techniques, and relapse prevention. In addition, many of the concepts are consistent with the good lives model, a strength-based approach that has been adopted by sex offender treatment programs internationally (see Collie, Ward, Hufham & West, 2007; Willis, Prescott & Yates, 2015).

The formal title of this program, I Decide: Cognitive-Behavioral Intervention for Adolescents to Control Impulses and Create Identity, was selected as the authors have integrated the concept of identity into the curriculum to refer to the personal qualities and beliefs that define an individual. For adolescents who have been adjudicated of sexual offending behavior, the authors felt that it was important to emphasize the development skills to support healthy sexual behaviors, personal relationships, and identity formation.

The Counseling Psychotherapy Center of Greater Boston Inc (CPC) provides treatment and programming for probation-involved youth with problematic sexual behavior. Their services are based on evidence-based cognitive behavioral therapies and juvenile sexual offending specific treatment programming which includes: assessment, case planning, individual treatment, group intervention, and family intervention services.

GEO Group provides the Group Interventions and Related Case Management Services for probation-involved youth. Their services include: group therapies that utilize cognitive behavioral therapy in the areas of problem-solving skill development, aggression replacement training, training intended to reduce the risk of misconduct and recidivism, gang intervention modules, and substance abuse programming.

COSA is a restorative reentry program committed to evidence-based practices that create safe communities by supporting persons 12-6 months pre-release through the first year of reentry. The COSA model was developed and is implemented primarily as intervention and support for problematic sexual behaviors and provides accountability for community safety. COSA Fresno has expanded services to those who have committed other serious and violent crimes occurring as a teenager. Each Core Member (client) is supported by trained community volunteers who commit to weekly meetings for one year. COSA works inside and out of prison institutions and Coalinga State Hospital, with emphasis on transformative programming around sexual harm and intimate partner violence. Duwe (2013) conducted a random control study with Minnesota DOC level 2 sexual offenders and demonstrated a reduction in sexual offense arrest of 88% and 49-57% reduction in general recidivism. The authors note that the sample size is small, however, the follow-up length and use of random assignment may mediate this limitation.

DBH currently provides limited specific assessments and treatment for problematic sexual behaviors. It is forecasted these agencies will be involved in the delivery of the programming specific to this subpopulation both in the facility and upon discharge into the community.

Describe how the County plans to apply grant funds to address support programs or services that promote healthy adolescent development for the target population. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code §1995(d)(3)(B) and (d)(8))

While the primary focus of the program will be to reduce youth recidivism and improve youth outcomes, this will be accomplished in the larger context of healthy adolescent development. Successful development results in a sense of independence, capability of forming meaningful relationships, and the ability to rationally manage challenges. The staff and community partners will consider the social, emotional, cultural, and cognitive needs of the youth in our care. While there is debate over what healthy adolescent development includes, it is clear a

variety of factors influence it including physical development, family cultural norms, and the unique variances of each individual child. Youth will participate in an orientation phase, to allow for a comprehensive intake process. Various professionals, in conjunction with the youth, will complete a portion of the assessment with a final report ready for use in preparing a comprehensive IRP by the team. Areas of the assessment will focus on tasks of adolescent development including psychological functioning, academic/vocational success and interests, physical health and maturation, family history and support, social development, and leisure activities and interests. The IRP will inform the Health Risk Assessment and Reentry Care Plan which are key elements of the CalAIM JI 90 day pre-release services. The Subcommittee recognizes the importance of thoroughness and accuracy in the assessment phase in order to develop an effective rehabilitation plan that is individually tailored to each youth. As such, a large investment will be made in contracting with experts and partnering with a variety of community agencies to conduct the appropriate assessments and assist with development of the IRP. In this vein, comprehensive assessments will be conducted for each youth upon entry to identify whether there are any expressive, receptive, or pragmatic language issues prior to development of the plan to inform the multi-disciplinary team on the effective ways of communicating information and delivering treatment to the youth.

These areas overlap with several youth-needs that will be the target of intervention during programming, including peer associations, family, education/employment, personality traits and emotional regulation, and leisure recreation. A large part of reducing risk for recidivism is to target the developmental needs of the youth that have also been shown to be relevant in their propensity for reoffending. The staff at the JJC will serve as role models and will interact with youth to encourage prosocial group values and norms, while holding them accountable and providing structure. This allows opportunities for staff to participate in professional development and connect with efforts to utilize credible messengers and peer navigators to support youth in custody, and during transition to the community. This balance between acceptance of the youth while setting limits will support the development of a healthy identity. The key will be developing a group that is coherent on the unit and has a healthy attachment to staff. Opportunities for age-appropriate activities will be provided during school and on the unit.

The select programming targets the developmental needs of youth and addresses the behaviors that have led to illegal behavior. The curricula utilized is developed for the population served and covers the content in an engaging and interactional manner. The teaching of coping, communication, and social skills is focused on through the use of role play. Moral development is targeted through helping youth engage in perspective taking and focus on internal and long-term consequences for choices. For example, Probation has selected the I Decide curriculum because a significant tenet of the I Decide curriculum for youth adjudicated of problematic sexual behavior is the development of a healthy identity and normative sexual development.

Finally, a significant portion of the time with Probation will include the learning of a trade or in higher education. This is a critical component of helping youth form a prosocial identity and put them on the path towards long-term success.

Focus Forward staff has worked with Probation to establish a Youth Council, Poetry/Writing program and Mural for multiple youth, including SYTF youth. The Youth Council brings housing unit leaders to meet monthly with Probation and Service Provider Administration to advocate for programs and services. While using their voice, the youth are learning valuable leadership and advocacy skills. The Poetry/Writing program is overseen by Focus Forward staff and administered by a Fresno City College instructor who volunteers her time to teach youth how to express themselves through writing. A Poetry Slam was organized in July 2023, where youth read their poetry aloud to an audience of JJC and service provider staff and their family members. The mural was a project designed with a local artist to teach youth about mural painting and engage youth to assist in the painting of a large wall mural in the visiting area of the facility. Several youths reported enjoying the activities because they were meditative in nature.

Describe how the County plans to apply grant funds to address family engagement in programs for the target population. Describe any progress on this element since May 1, 2023, at the end of your response: Welf. & Inst. Code §1995(d)(3)(C) and (d)(8))

Family intervention is a vital component when working with justice-involved youth. Given the length of confinement many of the targeted youth will serve, it will be essential to support continued engagement with their family and community. This will be achieved through outreach and opportunities for visitation, earning of community passes, and step-down and discharge planning that includes family reunification. Programming will include a wide range of interventions that are designed to increase healthy family patterns to support the gains of the youth in programming. Probation plans to explore partnering with DBH for the provision of Functional Family Therapy (FFT). A systematic review by Hartnett, et al (2016) noted that FFT outperformed untreated controls, as well as alternative programming including cognitive behavior therapy, other models of family therapy, and parenting services to reduce youth behavioral and substance use. Those families with the greatest need will be prioritized for referral for this service.

There are a variety of community-based agencies available to provide therapy and could be supported to provide additional services for families. To build this capacity Probation would like to support the community-based organizations in securing training in the Family Systems Trauma (FST) Model. FST is based on Parenting with Love and Limits, an evidence-based model developed by Scott Sells. The model has been effective in family reunification and helping families deal with trauma. The certification in the use of the model includes training with the author, consultation on cases, and review of practice delivery. This approach could be initiated with the youth in the institution to support inclusion of the family in the treatment process or initiated upon discharge as a component of reintegrating the youth into the home.

Regardless of ability to participate in family services, there will be active outreach with families, which may include extended family, and non-related support persons considered like family by the youth or caregivers, spouses, significant others and children, to provide updates and involve them in the programming and planning related to the youth. The family will be interviewed as a part of the assessment phase, as well as to gather additional data as necessary through the duration of the program. Visitation and home passes are viewed as an essential component to support the transition back to the community and help the youth stay attached to their family. For those youth who are out of county, this will be more challenging. In light of this, video visitation and other accommodations will be pursued to promote family engagement.

The community is also available to provide parenting classes to the youth's parents, as well as offerings for those youth/young adults that are parents themselves. Some of the available programs include: Bright Futures (Focus Forward's Nurturing Parenting, and Just Beginnings sessions), Partner in Parenting (GEO), Community Justice Center and NAMI Fresno provides education classes, presentations and support groups specifically for families with loved ones living with mental health challenges. NAMI Basics, NAMI Family to Family and NAMI Family Support Group are available at no cost and delivered from a lived experience perspective. These are some of the programs available to support families of youth in the SYTF program.

Since May of 2023, Focus Forward has organized a "Siblings Day" for committed youth at the JJC and bring in up to 4 family members to participate in family activities during the holiday season. Seven (7) youth and their family members attended. In addition, Alice M. Worsley School of the FCSS provides up to ten, on-site or virtual, evening parent meetings throughout the school year for the purpose of jointly developing and improving school goals and services. The FCSS also hosts evening parent workshops at our Violet Heintz Education Academy site where all Court and Community Schools parents are invited to participate. The workshop topics for the school year are designed with input from Court & Community Schools' parents through surveys at minimum. Lastly, Worsley School invites students, parents, and families to participate in four (4) morning virtual

meetings for the Court Schools Parent Teacher Association (PTA) to provide their input on additional school programming and services.

Describe how the County plans to apply grant funds to address reentry, including planning and linkages to support employment, housing, and continuing education for the target population. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code §1995(d)(3)(D) and (d)(8))

Fresno's plan aims to improve on this by raising education attainment rates at release for the new program, as well as create linkages to employment to create employment opportunities pathways to build a career and entrepreneurship, not just have a job. Through partnerships with local education providers as well as employers, linking Fresno's program with community partners is a core strategic goal. A tattoo removal program is an area of need for SYTF and other youth to increase employability, improve self-esteem and align their physical presentation with their psychological transformation. This need has been proposed by the JJC Youth Council. JJC will leverage CalAIM JI 90 day pre-release services to support transitions of care and successful reentry with warm handoffs to post-release care managers.

The FCSS is positioned to provide and extend services to this population. Upon admission each student will receive a comprehensive educational and vocational transcript analysis to aid in the development of an academic and career plan. Students will attend school in the Alice Worsley School, integrated with other students depending on age and academic needs. Students up to age 22 with disabilities will have full access to special education and related services as determined by the school's Individualized Education Program (IEP) team. Individual and small group services may include an emphasis on the development of cognition, language, social, behavioral, self-help and academic skills at minimum and in accordance with the IEP. FCSS has partnered with Probation for many years in delivering high quality education services for young people at the JJC. The Alice Worsley School has achieved full accreditation by the Western Association of Schools and Colleges (WASC) for over 20 years with goals that include students achieving proficiency in academics, 21st century skills, and college and career readiness. The school provides all courses necessary for young people to earn their high school diploma, including A-G courses, offers courses to prepare young adults to pass the High School Equivalency Test (HiSET) where applicable, offers dual enrollment courses for eligible high school students, and provides education year-round, including after school educational programming and on scheduled Saturdays. In addition, the school offers Career Technical Education and Regional Opportunities Program courses that currently include Welding and Environmental Horticulture Science.

Higher Education:

Eligible high school students at Alice Worsley School have access to Fresno City College Dual Enrollment Program, whereby high school students complete college and high school credits simultaneously. The dual enrollment courses offered are in concert with the rigor and requirements at the college level, the majority of the courses are CSU/UC transferrable, and upon completion of the courses, the students' grade point average is weighted accordingly. As academic services and programs expand over time, the existing remote and Worsley-campus classes may grow to include students attending classes at a local college campus. This projection may demonstrate an effective path for young people upon re-entry. One example of a community resource that assists with university awareness, readiness, and opportunities for our young people is Project Rebound (Fresno State), where the focus is reintegration in a college setting for justice-impacted young persons. The school's guidance learning specialist and principal maintain collaboration for scheduling campus visits with Project Rebound representatives.

Project Rebound is a program designed to help formerly incarcerated individuals successfully reintegrate into society via higher education. Project Rebound prepares serious students for a university mindset. Project

Rebound assists in helping fill out enrollment forms, provides mentors, conducts academic advising, and provides a space to support students.

Additionally, Focus Forward maintains a strong partnership with Fresno City College, Probation, Fresno State's Project Rebound, Impact Justice, and Alice M. Worsley School. Focus Forward assists current and former justice-involved young people, including Worsley students through a program titled Pipeline to Opportunity. They are a placement site for CA Justice Leaders (CJL) AmeriCorps members with former justice involvement. AmeriCorps members are mentors, case managers and educators for justice involved youth working toward success. The goal is to help them transition back into society so they can become the next generation of community leaders. Focus Forward's Pipeline to Opportunity program reports 15 youth/young adults in the SYTF program were enrolled in Fresno City College courses while in-custody at the JJC in the fall of 2023 and spring of 2024 semesters. Fourteen (14) students have earned 271 units since they began their courses (may be prior to fall 2023) and one is a new student in progress of their spring courses. The average GPA for the 14 SYTF students is 3.49. Focus Forward is partnering with Fresno City College and Clovis Community College to strengthen the pipeline from incarceration to college with additional resources from the Rising Scholars network with the California Community College's Chancellor's Office.

The Alice Worsley School maintains a continuous collaboration with State Center Community College District (SCCCD) that includes Fresno City, Clovis, Madera, and Reedley campuses. Through this collaboration, college outreach specialists provide services for students to become more informed about community college opportunities, orientation, and may include registration, including completing the FAFSA application and placement testing.

The school is also a member of the State Center Adult Education Consortium (SCAEC) whereby California Adults in Corrections funds and services may support young adults on campus who are over 18 years of age in obtaining a high school diploma or support access for high school graduates on campus to post-secondary courses and vocational training. Eligible young persons for the SCAEC services have regular access to SCAEC Transition Specialists. The school's guidance learning specialist, principal, and SCAEC Transition Specialists work in tandem and schedule campus visits by the Transition Specialists to meet with young persons on campus individually or in small groups.

Vocational Training Programs:

Alice M. Worsley School offers Career Technical Education and Regional Opportunity Program (CTE/ROP) classes at the JJC. The impetus of the CTE/ROP program is that high quality technical and career training opportunities are essential to meet the ever-changing needs of both our students and communities. CTE/ROP classes provide multi-faceted leadership in employment preparation, the upgrading of skills of those employed, and career preparation emphasizing post-secondary education. Based upon rapidly changing technology, increased employer demands, and the necessity of lifelong learning, career preparation is a primary objective.

Currently the school offers CTE/ROP courses in Welding Fabrication and Application, Environmental Horticulture Science, and certification in Leadership/Workforce Readiness offered in the CTE/ROP courses. The Leadership/Workforce Readiness certification focuses on developing soft skills that are needed in today's workforce.

With expected growth of our young adult population with high school diplomas, the school in partnership with Probation, may expand CTE offerings to possibly include: increased and various agricultural course offerings, pre-apprenticeship opportunities, Pinegrove Fire Camp, building trades, Microsoft Office Systems (MOS) certification, and animal husbandry. There is an identified need for additional and diverse vocational training offerings.

Probation is currently finalizing a Memorandum Of Understanding (MOU) with the California Department of Correction and Rehabilitation (CDCR) for STYF Youth intake and admission. The target goal date is by June 2024 for approval from the Board of Supervisors.

Youth released from incarceration often do not have access to meaningful employment opportunities. To ensure investments in vocational training are maximized, Probation will continue to collaborate and increase connections with other agencies to identify local employers or trade unions to establish employment pipelines into jobs that pay livable wages. Opportunities for transitional jobs such as wage-subsidized internships, stipends for community service, and time-limited, subsidized positions will potentially be expanded. To the extent possible, placement into these jobs will begin as soon as possible when youth enter “step-down” phases.

Community Reentry Services:

Justice-involved youth often have few, if any, financial resources and may not have family members that they can rely on for food and shelter upon release. Probation and other agencies serving realigned youth are committed to addressing all the stabilizing needs of released youth and are prepared to provide financial assistance when possible as well as referrals for concrete services and resources such as transportation, food vouchers, relocation supports, clothing, school supplies, and hygiene items. The Realignment Workgroup will evaluate options such as ensuring access to Extended Foster Care Benefits for those eligible, utilizing statewide grants to establish a basic income pilot, or partnering with community-based organizations to identify stipend funds. When available, youth can be referred to local community-based organizations to ensure credible messenger reentry programming.

Probation has applied for and received PATH 3 funding for justice involved youth. CalAIM enhanced care management (ECM) services will be utilized to identify social determinants of health (SDOH) and access to care issues that may be encountered when released and will connect youth to an ECM provider prior to their release who will be able to assist and support youth post-release in receiving necessary services. Probation will leverage CalAIM services to connect youth to health care providers, governmental agencies, and community-based organizations when needed. Probation will utilize CalAIM to connect youth to trusted messenger community-based organizations.

Several community-based organizations are available to provide for the reentry needs of the youth and young adults upon their release to the community, such as (GEO Day Reporting Center, Workforce Connection, Focus Forward, Project Rebound, CPC, and CJC).

The GEO Group’s ERP provides for a full complement of services to support educational and vocational assessment, training, and support. This includes resume support, computer labs for job seeking purposes, and job readiness training. They have Barriers to Employment Success Inventory (BESI) assessments and curriculum modules available to support instruction on the skills necessary for workplace success.

GEO Group is working to provide reentry services to probation-involved youth for group intervention and case management, which includes programming for youth in-custody, youth in the community, and youth being released from the JJC, with supplemental services provided virtually, as needed. The services include group therapies that utilize cognitive behavioral therapy in the areas of problem-solving skill development, anger management, training intended to reduce the risk of misconduct and recidivism, gang intervention modules, and substance abuse programming.

The GEO Group’s Reentry Employment Program (ERP) is preparing to provide a group intervention for those who have limited success in procuring and sustaining employment. Cognitive-Behavioral Interventions for Employment (CBI-EMP) is designed for adults and juvenile justice-involved individuals who are moderate to

high need in the area of employment. The curriculum integrates cognitive behavioral interventions with more traditional employment approaches. The program teaches individuals how to identify and manage high risk situations related to obtaining and maintaining employment. Heavy emphasis is placed on skill building activities to assist with cognitive, social, emotional, and coping skill development for the work environment. Using a modified closed group format with multiple entry points, the curriculum is designed to allow for flexibility across various service settings and intervention lengths. This curriculum was developed by the UC in partnership with MDRC.

OVERVIEW

Components of the 31-session curriculum include the following five modules:

- Module 1: Motivational Enhancement – Getting Them Ready for Work
- Module 2: Cognitive Restructuring – Thinking Right about Work
- Module 3: Social Skills/Emotional Regulation Skills – Skills for Work
- Module 4: Problem Solving – Working through Challenges at Work
- Module 5: Success Planning – Being Successful at Work

Probation is able to refer to the GEO Group for intensive services and would be able to provide additional structure and support to program participants who have transitioned to the community and have difficulties maintaining employment/education, stability, or as an alternative to Probation violation.

Workforce Connection is located throughout Fresno County and provides services that encourages careers in a variety of fields. The Young Adults Services includes a variety of services related to academic success, job readiness, and guidance and support.

Focus Forward has programs that support a range of reentry needs of youth and young adults. Through assessments and case planning, case managers and mentors work with youth and their families in collaboration with Probation, Well Path, TURN Behavioral Health Services and other community partners to support youth while they are in custody through transition post release with a shared case plan. Areas of focus include Academic Education, Workforce, Life Skills, Medical/Behavioral Health, Safety and Relationships. Programs provided include Nurturing Parenting for youth parents, and for youth with their parents; Just Beginnings for youth parents and their babies, Safe Dates and Money Habitudes group classes for youth in custody, Higher Education matriculation and one-on-one mentoring support throughout. In addition, case management services provide unique support individualized to the youth or family as needed (i.e. forklift certification, employment readiness, document attainment, application assistance, etc.). Tangible resources and financial support are provided to remove barriers to program participation. Referrals to other community based or in custody programs and services are also provided. Transition from Focus Forward programs will include an intentional handoff to youth/family's established support networks. This is an approach to support self-sufficiency for long term success.

CJC is invested in serving the target population and has a long- standing relationship with Probation. CJC offers Cognitive Behavioral Intervention (CBI), family group conferences, and victim offender mediator sessions and will continue to be an available resource.

Project Rebound is a program designed to help formerly incarcerated individuals successfully reintegrate into society via higher education. Project Rebound prepares serious students for a university mindset. Project Rebound assists in helping fill out enrollment forms, provides mentors, conducts academic advising, and provides a space to support students.

The school is a member of, and works in partnership with, the State Center Adult Consortium (SCAEC). The SCAEC is one of the 71 adult education consortia in California, and its region is located within the San Joaquin

Valley, and includes Fresno and Madera counties and borders portions of Kings and Tulare counties. The goal of the consortia is to improve adult education services focusing on increasing transportation options for students, enhancing successful transitions to college or career, partnering with Workforce Development Boards, better serving students with disabilities, and increasing counseling services.

The SCAEC Transition Specialists are invited to be part of the school transition process team along with the school's guidance learning specialist, and together provide valuable linkages to community service providers and/or universities. Transition plans will be discussed with students and referrals to various community-based organizations and adult schools, or universities will be made in alignment with students educational and career goals.

CPC provides reentry services based on evidence-based cognitive behavioral therapies and juvenile sexual offending specific treatment programming. Services include assessment, case planning, individual treatment, group intervention, and family intervention. Programming is provided to probation-involved youth which includes youth in-custody, youth in the community, and youth being released from the JJC, with supplemental services provided virtually, as needed.

COSA is a restorative reentry program committed to evidence-based practices that create safe communities by supporting persons 12-6 months prerelease through the first year of reentry. The COSA model was developed and is implemented primarily as intervention and support for problematic sexual behaviors and provides accountability for community safety. COSA Fresno has expanded services to those who have committed other serious and violent crimes occurring as a teenager. Each Core Member (client) is supported by trained community volunteers who commit to weekly meetings for one year. The COSA Case Manager works with the client to develop a Wellness plan that outlines the client's needs and goals. The Wellness plan covers important areas like housing, employment, transportation, rebuilding family/community relationships, making amends, substance use and recovery support. The client works with the case manager and circle volunteers to implement their Wellness Plan post-release.

Lack of transportation remains a huge barrier to reentry services. There is no means of public transportation to the SYTF. Workgroup deliverables will include efforts to remedy this and implement viable and accessible modes of transportation to and from this location.

Housing:

Appropriate housing to facilitate reentry and LRP has been identified as a need that requires targeted efforts. Probation has a long tradition of utilizing a variety of foster and Short-Term Residential Therapeutic Program (STRTP) placements for youth under supervision. CalAIM pre-release ECM services will facilitate these efforts. Probation will continue the strong collaborative work with the Department of Social Services related to suitable foster care placements for eligible youth, which includes family finding, other relative/family-based placements and community housing opportunities. These relationships will continue to be utilized as necessary upon discharge. The identification of a placement that will best address the needs of youth without suitable homes will be initiated several months before potential release from the JJC, and may include transition-aged youth family finding services and expanded transitional housing. Probation intends to seek additional housing services offered in the community to include: Housing Authority, Community Justice Center, Fresno County Homeless Task Force, and Turning Point; all agencies that provide or assist with transitional housing. Additional opportunities for independent living will be explored in subsequent years as the population transitions from the facility to the community. It is essential that they provide an environment that is conducive for the changes initiated in the program and provide a prosocial support system. This will help cultivate an establishment in the community and reinforce efforts towards connections with education, work, and civic organizations.

Describe how the County plans to apply grant funds to address evidence-based, promising, trauma-informed and culturally responsive programs or services for the target population. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code §1995(d)(3)(E) and (d)(8))

Evidence-based interventions mean a program or practice that has a high level of research indicating its effectiveness, determined as a result of multiple rigorous evaluations including randomized controlled trials and evaluations that incorporate strong comparison group designs, or a single large multisite randomized study, and, typically, has specified procedures that allow for successful replication. These can often be adaptations of successful models but should center on a key outcome targeted for the new facility, as well as a program design that incorporates approaches shown to work.

For youth who may benefit from additional interventions relative to substance use, Probation has capacity to provide or contract for delivery of Cognitive Behavioral Interventions for Substance Use. The Cognitive-Behavioral Interventions for Substance Abuse (CBI-SA) curriculum is designed for individuals that are moderate to high need in the area of substance abuse and well suited for justice-involved youth. As the name of the curriculum suggests, this intervention relies on a cognitive behavioral approach to teach participants strategies for avoiding substance abuse. The program places heavy emphasis on skill building activities to assist with cognitive, social, emotional, and coping skill development. The components of the curriculum include DBH also has a network of SUD providers delivering SUD treatment for Medi-Cal beneficiaries in the community.

CJC advances safety, shared responsibility and healing through evidence-based programs and services. This is accomplished through values of community, support, accountability, commitment, diversity, and restoration. The programs offered are grounded in these values and CJC ensures that restorative justice practices and processes are fully and authentically provided. CJC provides internationally proven evidence-based programming scanning the scope of the criminal justice system, from prevention to intervention through incarceration and reintegration into the community through two primary programs: VORP serving youth and COSA serving adults in Fresno County impacted by the criminal justice system.

Additional offerings in the community to address needs include Thinking for a Change, Youngsters for Change, CBT Anger Management, Phoenix/New Freedom, Living in Balance, Moral Recognition Therapy, Interactive Journaling, Insight Awareness and CJC.

GEO Group will be implementing additional curriculums to be responsive to the needs of the SYTF Youth. Anger Management - ***Phoenix New Freedom Managing Aggression and Violence*** is a skills-based 50-hour program designed to address key issues in aggression and violence. Each lesson is supported by a session opener from the What Do You Think? series, a subtle approach to cognitive restructuring that includes issues relating to aggression, violence, risk and protective factors, substance abuse, victim empathy, and moral dilemmas. The program includes an ample supply of What Do You Think? scenarios so that each individual instructor may choose ones that best reflect his or her specific group of participants.

Additionally, for those youth in the community, ***Phoenix New Freedom Gang Intervention Program*** is a 32-hour gang intervention based on cognitive-behavioral, motivational interviewing, and social learning philosophies. It is designed to reduce the resistance to behavioral change and decrease antisocial behaviors, including gang activity. Includes a DVD-based unit with clips of incarcerated youth discussing their involvement in crime and gang activity.

Trauma-Informed Approach:

The model utilized is congruent with a trauma-informed approach. Staff at the JJC receive training on the types of traumatic life events that youth may experience, as well as the potential that trauma responses are easily triggered in the facility. Staff are trained to notice the signs and symptoms of trauma and bring this to the attention of supervisory staff and mental health professionals. The importance of behaving in a way that reduces the risk of re-traumatization is covered in detail. Additional training and coaching will be emphasized on this concern during the crisis de-escalation and physical management course due to the significant risk posed to retraumatize youth during these periods of agitation. Staff are supervised and reminded that much of the reactions of the youth are related to their past trauma and delayed cognitive development. Trauma-related symptoms are easily mistaken as aggression or noncompliance. Taking an approach of attempting to control or punish the youth for this behavior is counterproductive. Instead, staff need to follow a process of verbally engaging the youth, developing a collaborative approach, and using verbal de-escalation strategies, when at all possible. Core Correctional Practice are used to help promote safety through teaching skills of cognitive restructuring, emotion regulation, structured social skills, and problem solving. All of these approaches rely on a stable and collaborative relationship. Probation staff will be assigned to the designated unit to allow for the development of a consistent, familiar, and trusting relationship to develop.

Youth who demonstrate consistent behavioral disruptions or present with symptoms of mental disorders or intellectual disability and other development disorders will be referred for a specialized plan to better support the youth in their success on the unit and in various activities. This plan, along with any necessary safety plans will be developed with the input from the youth, family and all providers involved in interactions with the youth. A safety plan may be established and reviewed daily to enable the safe integration of the youth in all daily activities. Integration of credible messenger mentors into unit programming will further facilitate a trauma-informed approach. Relationships with mentors who have been in similar situations themselves can help youth understand their reactions and ensure youth are learning to recognize and respond to triggers effectively.

Gender and Culturally Responsive Services:

Understanding the historical construct of institutional racism is fundamental to critically examine the youth justice system's structural investments in custody, control, and punishment to achieve public safety. This system of racial hierarchy must be clearly understood in the current construct, acknowledged, and directly engaged if we are to achieve equity and well-being for communities of young Black and Brown people.

It is critical that a stance of inclusion and respect be at the core of every interaction with the youth and their families. In Probation, the philosophy of cultural responsiveness is seen in several ways. First, Probation is comprised of a diversified staff. It is essential that all youth can look to staff for relatable role models and opportunities to talk with adults with a shared cultural experience.

In addition, community-based organizations that specialize in or work with specialty populations are represented in the network of providers utilized by Probation. Staff make referral decisions based on resources that are most likely to result in a feeling of trust and comfort by the family. There is an effort to reflect a variety of cultures most represented among the youth at the JJC in the artwork displayed, stories and books available, menus and snacks, as well as providing cultural heritage events or activities.

These principles are taken seriously in both employee policies and the guidelines enforced with the youth. There are serious consequences for youth who engaged in hate speech or actions. Staff are afforded opportunities to attend trainings on different ethnic and racial topics and are supervised with an emphasis on awareness of contextual factors and sensitivity.

Community-based organizations are available to provide additional programming and support in areas geographically convenient and responsive to the diverse population in Fresno County.

Any girls who are adjudicated on 707(b) offenses and warrant a long-term period of confinement will be retained locally. Services for girls will be selected with an emphasis on gender responsive programming.

Fresno County Juvenile Probation Officers are trained to complete the Commercial Sexual Exploitation – Identification Tool (CSE-IT), for youth who are or may be involved in Commercial Sexual Exploitation of Children. Youth who are vulnerable to exploitation may be eligible to receive additional supportive services in the areas of housing, mental health and substance use counseling, and mentoring.

Describe whether and how the County plans to apply grant funds to include services or programs for the target population that are provided by nongovernmental or community-based providers. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code §1995(d)(3)(F) and (d)(8))

Probation is committed to a system-wide initiative to prepare for and deliver services to support the needs of the realigned youth. As a result, existing contracts with nongovernmental and community-based providers will be expanded through the grant funds awarded the department. While the specific details of the budget are pending, plans are underway to provide for a process to efficiently extend, enhance, or initiate new contracts for necessary services.

Total statewide funding will be \$208.8 million at full implementation. The realignment target population for the grant program shall be defined as youth who were eligible for commitment to the Division of Juvenile Justice prior to its closure and shall further be defined as persons who are adjudicated to be a ward of the juvenile court based on an offense described in subdivision (b) of Section 707 or an offense described in Section 290.008 of the Penal Code.

Commencing Fiscal Year 2021-22, and annually thereafter, an allocation is to be budgeted to counties to provide appropriate rehabilitative housing and supervision services for the realigned DJJ population. In making allocations, the Board of Supervisors shall consider the plan. For the 2021-22 fiscal year, thirty-nine million nine hundred forty-nine thousand dollars (\$39,949,000) shall be appropriated from the state General Fund to provide appropriate rehabilitative and supervision services for the realigned population. The by-county distribution shall be based on:

- 30 % of the per-county percentage of the average number of wards committed to DJJ, as of December 31, 2018, June 30, 2019, and December 31, 2019
- 50% of the by-county distribution of juveniles adjudicated for certain violent and serious felony crimes per 2018 Juvenile Court and Probation Statistical System data
- 20% of the by-county distribution of all individuals between 10 and 17 years of age, inclusive, from the preceding calendar year

In order to receive 2022-2023 funding pursuant to Section 1991, a plan shall be filed with the Office of Youth and Community Restoration by January 1, 2022. In order to continue receiving funding, the Subcommittee shall convene to consider the plan every third year, but at a minimum submit the most recent plan regardless of changes. The plan shall be submitted to the Office of Youth and Community Restoration by May 1 of each year.

For the 2024-2025 fiscal year and each year thereafter, an estimated two hundred eleven million eight hundred eighty one thousand and ninety-seven dollars (\$211,881,097) shall be appropriated from the state General Fund to provide appropriate rehabilitative and supervision services for the population specified in subdivision (b) of Section 1990 based on a projected average daily population of 928 wards. The Governor and the Legislature shall work with stakeholders to establish a distribution methodology for the funding in this paragraph by January 10, 2024, and ongoing that improves outcomes for this population.

Grant Funding Priorities:

Funding activities that ensure structure, rehabilitative services, and a collaborative atmosphere informed by a Trauma Informed Care and an Evidence-Based approach is key. Fresno County is committed to positive outcomes and will continue to review and modify as appropriate the County's funding plan.

Evidence-Based Practices:

Fresno County is committed to Evidence-Based Practices (EBP). As noted above, evidence-based services and programming will be made a funding priority. These are Cognitive Behavioral Therapy (CBT) programs and other best practices that have been proven to address criminogenic needs, reduce recidivism build strengths of youth and their families. Both sworn and non-sworn staff, as well as contracted service providers, will facilitate these treatment modalities to youth.

Trauma Informed Care and Training:

Fresno County is dedicated to a Trauma Informed Care (TIC) approach that reduces the impacts of adverse childhood experiences. Ongoing training of County and contracted staff will be a priority to ensure the permanency of these practices.

Unit Supervision:

To provide rehabilitative services to these youths, safety and security must be a core tenant. Juvenile Corrections Officers (JCO) and CBOs will collaboratively provide youth supervision and guidance in day-to-day activities.

Support Staff:

With the additional population tangential work will increase. This includes additional needs for one Principal Staff Analyst, one Senior Staff Analyst, and one Staff Analyst to provide oversight of the Juvenile Justice realignment implementation. Clerical needs will also increase requiring Office Assistant support. Fresno County Peer Support Specialists possessing lived experience will provide support to youth and families at all phases of the SYTF process.

Data Collection:

Initial and ongoing data collection is important to the sustainability of successful outcomes and will be prioritized over the next cycle. A Fresno County Information & Technology Analyst, and private information technology contractor will be assigned to focus on this task. Data Processing is required to fulfill the data reporting requirements the SB 823 plan.

Management:

Having managerial oversight will help ensure that aspects of the plan are adhered to and followed. An Assistant Deputy Chief Probation Officer (ADC) has been added and reports to the JJC Deputy Chief Probation Officer. This ADC will continue to help set standards, handle personnel matters, act as a community liaison and perform other administrative duties.

Contracted Specialized Services:

Fresno County intends to partner with community-based agencies to fill identified gaps in services. CBOs will also be identified via the request for proposal process to administer programming identified through Probation's work with the UC. A Fresno County Social Work Practitioner will act as County liaison, coordinator, and direct provider of these services.

Contracted Out of County Programming:

Certain youth, depending on their specialized needs, may benefit from a non-local custodial placement. These cases, while uncommon, may occur; therefore, it is important to prepare for such a contingency. It is also a prudent to ensure all youth have optimal opportunities to be placed in a program that best suits their needs.

Reentry Supports:

Developing reintegration services for youth returning from both DJJ and SYTF is a priority for Fresno County. It is anticipated there will be a variety of tangible needs to help the release transition be more successful. Anticipated needs include food, clothing, housing, transportation, vocation, education, recreational, and financial supports. To accomplish this, funds must be designated to support efforts, which will include developing agreements with community-based organizations and other support-focused entities. Reentry agreements have been developed and have begun services which include Focus Forward, GEO Group, and CPC. Probation will leverage CalAIM 90 day pre-release ECM services to support the identification of SDOH and access to care challenges and coordinate with a post-release ECM provider to ensure identified needs are met.

Infrastructure Improvements and Equipment:

New or retrofitted programming rooms, playground areas, safety and security upgrades, home like furnishings and much more are necessary to provide the homelike environment. As additional capital project funding becomes available, step-down housing support will need to be developed.

Category	FY 2024-25
IT Contractor	50,000
Administrative Support	217,837
Fresno County Superintendent of Schools (FCSS)	165,375
UC Agreement	135,000
Information Technology Analyst	172,669
SYTF ADC, SW, DPO	468,695
JJC Pod Staffing/Maintenance for SYTF	3,511,145
Group Interventions and Case Management Programming	360,000
Juvenile Sexual Offending Treatment Programming	488,710
Programming Contracts	500,000
Youth Reentry Fund	30,000
Contract for Step-Down Facility	3,000,000
Total	9,099,430
One-Time Cost	
Step-Down Facility Construction	2,000,000
Total	2,000,000
Total Budget	11,099,430

Fresno County SB 823 Funding Allocations by Year:

Fiscal Year 2021-22: \$1,549,213

Fiscal Year 2022-23: \$4,443,373

Fiscal Year 2023-24: \$7,600,904

PART 5: FACILITY PLAN (WELF & INST. CODE § 1995(D)(4))

Provide a detailed facility plan indicating which facilities will be used to house or confine the target population at varying levels of offense severity and treatment need, and improvements to

accommodate long-term commitments. Facility information shall also include information on how the facilities will ensure the safety and protection of youth having different ages, genders, special needs, and other relevant characteristics. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code (d)(8))

JJC is being used as the initial location for the SYTF. Probation is committed to a collaborative, inclusive process to work toward the development of less restrictive step-down options and alternatives to secure placement at the JJC, as appropriate for the youth in our care.

JJC has a separate section for Commitment and Detention. Many of the youth that will be candidates for the SYTF program will be in Detention awaiting trial and disposition. Upon commitment to the SYTF program, youth will be transferred to a housing unit for orientation. During their stay in the unit, a thorough assessment will be conducted. This will include a variety of interviews and standardized assessments to gather a profile of the youth's psychological, social-emotional, and behavioral functioning. The results of the assessments will be compiled by the assigned case manager and a planning meeting will be scheduled to begin the development of the Individualized Rehabilitation Plan. In addition to assessment protocols, the youth will be oriented to the rules, structure, and goals of the program. This will include helping them understand the incentive and discipline system, levels and accompanying privileges, and schedule of activities and programs. Finally, the youth will participate in a group that provides a general orientation to the treatment model and begins to prepare them for transition to the core programming unit. The length of stay for the orientation phase will be variable based on the youth's adjustment, compliance with operations and rules, and readiness to begin the program.

The Core Programming Unit is a housing unit in the Commitment Facility. Given that the youth will be residing in this unit for an extensive period, the accommodations will be upgraded to provide a more comfortable and relaxed environment. Youth facilities are inherently stressful environments, and youth with custodial sentences are overrepresented with health-related issues (including mental health), history of trauma and adverse childhood experiences. It is also important to recognize that the environment cues behavior, and therefore normalized, supportive, trauma-informed environments can serve to facilitate treatment.

At the same time, higher risk youth have the potential to make weapons of common furniture or accessories, attention to avoiding items with removeable pieces, sharp corners or substantive weight is required to maintain safety. Selecting colors requires avoiding any association with gangs. Finally, creating blind spots poses a serious risk of violence and violation of the Prison Rape Elimination Act. While safety remains the priority, the design and décor of the unit has been modified to create a softer and more natural setting. The goal is to, as much as possible, allow for the normative environment as recommended in the Design Guideline published by the Native American and Alaskan Technical Assistance Project:

- Movable furnishing that permits changing use of space throughout the day and over time while offering some control over the environment;
- sound absorbing materials that mitigate the often disruptive and disturbing noise usually generated by youthful populations living together;
- open interior spaces, views to the outside, and natural lighting that reduce perceptions of crowding;
- ready access to outdoor spaces from housing and program areas so that the sense of confinement is minimized while program options are expanded;
- light colors, decorative accents and changing decorations that contribute to spatial openness, add visual variety and permit some sense of personalization;
- spatial variety throughout the day, with changing spatial scale and shapes that reflect those normally encountered in daily experience;

- familiar and variable construction materials that present no overt expectation of damaging behavior, often a self-fulfilling prophecy; and
- access to varying program activities at all times with appropriate space for residents to engage in satisfying formal and casual pursuits through daytime and evening hours so that residents and staff have options and no unproductive down time.

Research demonstrates that youth respond better in a normative environment (versus a traditional correctional setting). Normative environments contain natural light, views to the outdoors, vibrant colors and natural (or at least normal) materials, acoustic dampening (e.g., sound-absorbing materials on walls), ample personal space, and control over some personal territory. For example, Ulrich et al. (2012) published a report entitled “Toward a Design Theory for Reducing Aggression in Psychiatric Facilities” to delineate principles to follow to reduce stress.

Some of these relevant items include movable furniture, better acoustics, natural light and views, nature art, homelike design, proximity and visibility of common spaces to the staff station. Similarly, Connellan et al. (2013) support this notion of creating a therapeutic milieu that includes comfort, natural light, freedom, reduced stigma with spatial designs that mimicked a ‘normal’ community setting. They go on to discuss the inclusion of various textures, access to nature, and reduction of repetitive sounds. Karlin and Zeiss (2006) indicate that function of space, color selection, lighting, carpeting, wall graphics and furnishings should be considered in the interior design of the facility.

There are some common themes that are central to the design of the core programming unit. Any opportunity to provide choice or control over the living space will be considered. For example, variable sources of lighting, movable and various types of furniture, access to books or other similar items, choice in menu items, personalization in room decoration, and areas for relaxation or socialization. This also serves to empower youth to make spaces their own and reduce the likelihood that they vandalize property. The environment will be designed using colors that are visually interesting without overstimulating. The texture and décor will be considered based on themes of nature and warmth of texture. Recommendations include similar color schemes to those below.

The housing unit is a single tier with two wings (sides) that can hold up to 30 youth. There are 18 rooms total – with 12 two-youth rooms and 6 single-youth rooms, with an officer station in the center. To create a normative environment, as much as possible, the living spaces are open to reduce confinement and support free movement. Comfortable de-escalation spaces are established to support youth agency and emotion regulation. Given that the program began with one unit, there are less possibilities for assigning youth to other housing units and areas. Those younger or more vulnerable youth are housed on one side of the unit.

To ensure compliance with the Board of State and Community Corrections (BSCC) Title 15 standards, means of assigning youth to designated areas will preside based on such requirements as age, maturity, sophistication, emotional stability, program needs, legal status, public safety considerations, medical/mental health considerations, gender and gender identity of the youth. The department is committed to reducing implicit bias in housing assignment decisions and when possible, objective criteria such as assessed needs will be given consideration. Adjustments will be made if there is an observed pattern of behavior that creates a potential for an unsafe environment.

There are currently six dedicated programming rooms under construction that is projected to be completed by June 1, 2024. Control panels are also installed and under configuration to ensure all functions are working properly prior to occupying the designated space.

Describe how the plan will incentivize or facilitate the retention of the target population within the jurisdiction and rehabilitative foundation of the juvenile justice system, in lieu of transfer to the adult criminal justice system. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code (d)(8))

A 2010 Office of Juvenile Justice and Delinquency Prevention bulletin by Richard Redding reviewed several large-scale studies related to the transfer of juvenile violent crimes to the adult system. Those studies showed that juveniles tried in adult criminal court had higher recidivism rates as adults than youth that remained in juvenile court. The rehabilitative efforts in the juvenile system are more equipped to reduce recidivism than the more punishment-oriented adult system. The rehabilitative provisions put forth in this plan further support the benefits of keeping youth in the youth system. Providing services in their home county allows for engagement of the family, establishment of school or work, and ties to community services and activities. Youth with this intensity of services are more likely to be given a chance in the community and more likely to respond to that chance.

The Subcommittee membership includes representation from all levels of the court system and community representatives. Their comments and suggestions consistently support rehabilitative aims for this population. By providing a comprehensive and effective array of services that address the needs of the youth in our care, the need for more restrictive confinement will be reserved to those cases that continue to pose a serious risk to public safety through objective measures despite all available options.

The Subcommittee is actively working toward recruiting members with diverse perspectives who are committed to this work.

PART 7: REGIONAL EFFORT (WELF & INST. CODE § 1995(D)(6))

Describe any regional agreements or arrangements supported by the County's block grant allocation. Describe any progress on this element since May 1, 2023, at the end of your response: (Welf. & Inst. Code (d)(8))

Boys traditionally comprise most of the youth sent to DJJ and it is anticipated that this will continue to be true. As such, Fresno County has opted to focus on the housing and rehabilitation of boys and young men. Initially, the plan is to open one housing unit with the potential capacity of 30 youth. A second housing unit will be established for treatment for problematic sexual behavior, making the overall rated capacity for SYTF youth 48. Fresno welcomes boys from other jurisdictions that need rehabilitative services (including treatment for problematic sexual behavior). However, our community, like most around the country, has witnessed unprecedented declines in juvenile crime. We are confident in our services and expect that number to ultimately decline.

There is currently one youth from Merced as of September 20, 2023, and one pending MOU with the County of Tulare.

PART 8: DATA (WELF & INST. CODE § 1995(D)(7))

Describe how data will be collected on youth served by the block grant. Describe any progress on this element since May 1, 2023, at the end of your response:

Fresno County uses a modern database system to track all youth in its probation system of care. Data will be collected at multiple points for administrative and operational purposes, which will facilitate information sharing as well as high quality case management. Youth entering the new system of care will be entered into the Probation case management system, as will referrals for services. There is some concern with extracting

information for analysis, but the County will work to develop relevant MOUs to meet the complex needs of the youth being served by agency and community partners.

Additionally, it has been identified that improvements are needed to the current data collection system to accurately pinpoint, collect, and interpret the relevant data. The Subcommittee recognizes this as a priority over the next year.

Post-Release Assessments

It is the intention of Probation to collect data that is meaningful and relevant. Below are data points that the department will begin gathering from youth after release, effective 1-1-2024:

Do you need support to access any of the following services? (yes/no)

- Medical care – No 100%
- Behavioral health – No – 100%
- Substance use – No- 100%
- Dental care No- 100%
- Housing No- 100%
- Transportation No- 100%
- Clothing No- 100%
- Having enough to eat – Yes – 100%
- Public benefits or social services No- 100%
- Employment No- 100%
- Parental support No- 100%
- Education No- 100%
- Interpersonal relationship support No- 100%
- Sports and Recreational Activities No- 100%
- Tattoo Removal – Yes – 50%
- Personal safety No- 100%

Do you think your time in JJC prepared you to do the following when you were released: Yes/ No

- Continue your education -Yes- 100%
- Find a job- Yes- 50%

Are you enrolled in at least one college course? – Yes 100%

Are you employed at least 15 hours/week? Yes- 50%

Probation will attempt to collect the above data at the following intervals:

- 0-3 months after release
- 3-6 months after release
- 6-12 months after release
- 2 years after release
- 3 years after release

Pre-Release Assessment

In addition to collecting data through Probation, data will be collected while youth are in custody to assess preparation for release, and perceptions of the efficacy of programs offered while in custody. Pre-release data points will include:

- Which in-facility programs did you complete? (list completing in-facility programming as referred, by program) – Free Your Mind; Cognitive Behavioral Intervention for Substance Use (CBI-SU); Aggression Replacement Training (ART); Thinking For a Change (T4C); Money Habitudes; Choices, Gang Redirection
- Are you graduating with high-school equivalency education? - Yes
- How many college credits have you successfully completed? Enrolled
- What is your plan for what to do when triggered or overwhelmed? - Contact DPO
- Have you received adequate mentoring from trusted community members while in custody to prepare you for your release? Yes
- Do you feel you have been safe while in custody? Yes
- Do you think the services you have received and the people who have taken care of you while in custody have helped you feel good about yourself or your sense of well-being? Yes

Will you need support to access any of the following services when you are released? (yes/no)

- Medical care No- 100%
- Behavioral health No- 100%
- Substance use No- 100%
- Dental care No- 100%
- Housing
- Transportation
- Clothing
- Food
- Public benefits or social services
- Employment
- Interpersonal relationship support
- Sports and recreational activities
- Tattoo removal

Do you think your time in JJC has prepared you to do the following when you are released: (yes/no)

- Continue your education Yes- 100%
- Find a job-Yes 100%

Data:

Probation will use this data as well as other court data to generate the following reports that can be disaggregated by race and ethnicity and by the number of months or years prior to release, and after release for up to 3 years after release:

January 2023 to January 2024

- % of youth with new law violations – 3%
- % of youth enrolled in at least one college course - 57%
- % of youth employed at least 15 hours/week - 6%

- % of youth enrolled at last half-time in school – 90%
- % of youth connected to a mentor or caring adult - 90%
- % of youth who have a plan for what to do when triggered or overwhelmed – 90%
- % of youth who identified housing needs at their last assessment who were connected to resources within 30 days of release or since their last assessment - 0
- % of youth who identified food needs at their last assessment who were connected to resources within 30 days of release or since their last assessment -0
- % of youth who identified clothing needs at their last assessment who were connected to resources within 30 days of release or since their last assessment - 0
- % of youth who identified transportation needs at their last assessment who were connected to resources within 30 days of release or since their last assessment – 75% NIC
- % of youth who identified public benefits or social service needs at their last assessment who were connected to resources within 30 days of release or since their last assessment– 0
- % of youth who identified personal safety concerns at their last assessment who were connected to resources within 30 days of release or since their last assessment - 0
- % of youth who identified a mental health need at their last assessment who were connected to services within 30 days of release or since their last assessment – 3%
- % of youth who identified a substance use need at their last assessment who were connected to services within 30 days of release or since their last assessment – 3%
- % of youth who identified a medical need at their last assessment who were connected to services within 30 days of release or since their last assessment - 0
- % of youth who identified a dental health need at their last assessment who were connected to services within 30 days of release or since their last assessment - 0

Timely collection and reporting of data related to SB 823 implementation is critical to ensure (1) there are no net-widening impacts in commitments to the local SYTF; (2) the Plan sufficiently protects against an increase in adult court transfers of youth in Fresno County; (3) there is an ongoing racial and ethnic disparity analysis to monitor the impact of the most restrictive and punitive decisions on youth of color compared to white youth; and (4) “step-downs,” or less restrictive programming for eligible youth to serve the remainder of their baseline term or modified baseline term, is being utilized to the greatest extent possible.

Describe outcome measures that will be utilized to measure or determine the results of programs and interventions supported by block grant funds. Describe any progress on this element since May 1, 2023, at the end of your response:

Recognizing the importance of evaluating longitudinal outcomes for youth, and the existing challenges related to collecting qualitative and quantitative data after a person is no longer under the jurisdiction of the Court, Probation plans to develop a multi-year strategy to design and test methods of collecting data over time. To achieve this goal, Probation will conduct a literature review, which may include leveraging relationships with

institutions of higher education, to understand the best available evidence and current research on post-justice involvement data collection. Probation will leverage the expertise and life experience of our local youth who are involved (or were involved previously) in the justice system; meaningful involvement may include focus groups, surveys, and other strategies to partner with current and formerly justice-involved youth so that they may contribute to a youth-informed and evidence supported design of a data collection methodology. This longitudinal data collection is critical to understand longer term outcomes of programs and services. Ideas to explore with youth may include such topics as an informed consent for data collection, leveraging technology for communication in ways that are comfortable for youth, how to ensure privacy, how to ensure that the young person trusts how their data will and will not be used, how to address issues of equity, and other topics as identified by the data project planning team (with a youth representative on this team). With these two parallel processes, combining review of the best available literature and the critical voice of our local youth, Probation will develop an action plan to implement the data collection methodology for a beta test. The goal of the beta test phase will be to understand what worked, what didn't work, and what can be improved in the methodology and data collection strategies.

Fresno County will be tracking a broad range of process and outcome measures for youth served by this grant, with a particular focus on outcomes related to service provision and reentry. These outcomes will be developed in conjunction with program logic models, as many outcomes for these youth are long term into adulthood, which as noted above, is beyond the scope of Probation's data access for several reasons including, record sealing and privacy issues:

- Reduce the period of commitment for similar crimes by 20% with similar rates of recidivism
- Reductions in overall county confinement
- Reduce disparities in % white and black incarceration relative to their % in the population
- Increase interactions between incarcerated youth and representatives of community-based organizations that have the capacity to provide services prior to and after release
- Improvement in self-reported connection to family
- Reduction in self-reported trauma or mental health symptoms (e.g. depression, anxiety, irritability/agitation) upon release, 1 year after release, and 3 years after release
- Increase % of formerly incarcerated youth who are housed in stable housing after release
- Increase % of formerly incarcerated youth enrolled in at least one college course or employed at least 15 hours/week after release

PART 9: OTHER UPDATES: DESCRIBE ANY PROGRESS ON ELEMENTS SINCE MAY 1, 2023: (WELF. & INST. CODE (D)(8))

Provide a description of progress made regarding any plan elements and any objectives and outcomes in the prior year's plan, to the extent that they have not already been described above.

The Subcommittee has identified barriers to target and address over the next year.

- IT Support for data collection
- Staffing issues for full program implementation
- Current viable step-down program
- RFP Process for Step Down
- Construction for SYTF housing unit/ program rooms
- Limited Vocational opportunities
