Questions and Answers

Statement number 5. SOQ Submittal Requirements pertaining to the SOQ shall consist of up to three (3) parts: I need clarification, it looks like there are four (4) parts listed under the SOQ Submittal Requirements. Are the expectations to have this proposal broken out into four (4) components rather than three (3)

There are four components (See Addendum 1).

A. The SOQ requirements state we need to provide information in the fields provided pertaining to A. Solicitation Form (Required). Should we expect a form to populate, or should we provide a narrative for section A. Solicitation Form (Required)?

No form will be provided. Information can be outlined in a separate document (See Addendum 1).

B. and C. sections state the following: "Provide the following information uploaded to the Solicitation as a separate pdf for each:" Are we expected to create individual pdf's for B., 1-7 and C., 1-3?

Individual PDFs are not required. Documents can be combined for section B and for section C.
