Level of Care Information Age 0- 17: Outpatient Treatment

TARGET POPULATION INFORMATION:

Target Population: Families of present and past Substance Use Disorder Delta Care clients. This includes children and Adults.

FRESNOCOUNTY MENTAL HEALTHPLAN OUTCOMES REPORT- Attachment A

CORE CONCEPTS:

- **Community collaboration:** individuals, families, agencies, and businesses work together to accomplish a shared vision.
- **Cultural competence:** adopting behaviors, attitudes and policies that enable providers to work effectively in cross-cultural situations.
- **Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services:** adult clients and families of children and youth identify needs and preferences that result in the most effective services and supports.
- **Access to underserved communities:** Historically unserved and underserved communities are those groups that either have documented low levels of access and/or use of mental health services, face barriers to participation in the policy making process in public mental health, have low rates of insurance coverage for mental health care, and/or have been identified as priorities for mental health services.
- **Integrated service experiences:** services for clients and families are seamless. Clients and families do not have to negotiate with multiple agencies and funding sources to meet their needs.

Community collaboration

Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services

Access to underserved communities

Choose an item.

Please describe how the selected concept (s) embedded :

Community collaboration was realized through talking to member of churches and as a member of the community partners for recovery of which Delta Care participates very well and provides different scholl supplies materials to families and their school age children. Most families do not have access to some community events and some of the children feel very deprived and you can see this in their eyes as they participate in social events with others. We have seen families who have resolved family conflicts because they were invited to the programs. Delta Care has intervnened in family reunification process for clients and helped families to comply with other agencies including foster care providers.

PROGRAM OUTCOME & GOALS

- **Must include each of these areas/domains:** (1) Effectiveness, (2) Efficiency, (3) Access, (4) Satisfaction & Feedback Of Persons Served & Stakeholder
- **Include the following components for documenting each goal:** (1) Indicator, (2) Who Applied, (3) Time of Measure, (4) Data Source, (5) Target Goal Expectancy

Delta Care during the fiscal year 2017-18 seved 101 children 0-17 years old and 187 adults over 18. This included 196 Hispanics, 2 native Americans, 5 South East Asians, 36 Arican Americans, 45 Whites (non Hispanics, and 4 other. There were also additional 7 participated with no valid identification. Bassed on the program intended goals, Delta Care was able to bring families together for bonding by having park events. During the events families played games together, children met other children and learned how to interact. Staff helped to organize crafts and games for the children. The feedback was

Revised May 2018

great as families reported how much it helped to reinforce or creating bonding among families. The essence is to help bring families together while teaching children how to navigate through life without drugs. The park events were very successful but the planning and execution were very demanding. In each of the events there was bouncing house and music, food and entertainment. The inhouse programs range from 30-60 minutes where staff teach parents some parenting skills that help them to work with various levels of the growing up. In one of the events there was a mini soccer game that taught kids about sports and pressure.
