**Subject:** RE: Pipeline from Johann to CEE

Brano:

Per your request, WTE is willing to work with SAR 1 to coordinate with Maddox Dairy on a buried RNG pipeline that would allow access from your proposed digester/RNG project at the neighboring Johann Dairy to the California Energy Exchange (CEE) natural gas pipeline with the existing CEE interconnection point located on Maddox Dairy property. This proposed pipeline would be on lands entirely owned by either the Johann or Maddox dairies. We believe such a project would be supportive of WTE Riverdale's planned digester to RNG project at the Maddox Dairy (UCUP # 3679).

WTE has spoken with the owners at Maddox Dairy who are willing to collaborate with this pipeline, subject to final design, terms and conditions. WTE agrees that such a collaboration involving DVO digesters at each project site and interconnecting pipelines to the CEE system should benefit all involved parties and is therefore supportive of such an arrangement.

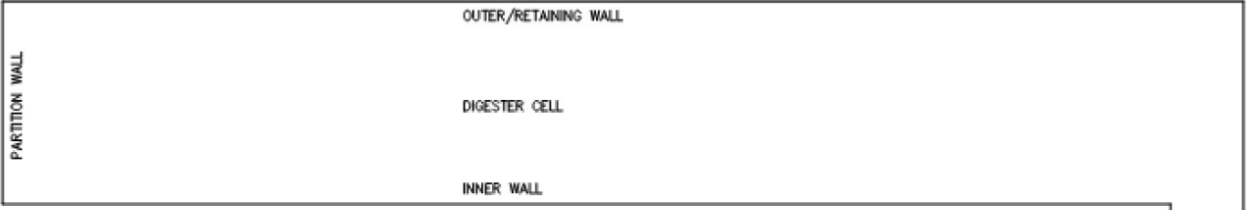

Sincerely,

Doug VanOrnum  
Member
