

# CAL AIM

## LEARNING STRATEGY - JULY

California Advancing and Innovating Medi-Cal (CalAIM) is a multi-year initiative by the Department of Health Care Services (DHCS) to transform and strengthen Medi-Cal, offering the people we serve a more equitable, coordinated, and person-centered approach to service delivery.

This transformation will remove unnecessary barriers to care for the people we serve and will decrease paperwork and burdensome process for prescribers, clinicians, case managers and peer/family support persons.

CalAIM is a shift in culture. Moving away from audit-based rules and fear around recoupment and back toward providing care based on clinical decision making and best practices.
