Program Type:	Contract Operated	Type of Program:	FSP
----------------------	-------------------	-------------------------	-----

Contract Term: June 1, 2014, through June 30, 2017 with 2 extensions for 1 year and 1 extension for 6 months. Contract renewal for January 1, 2020, through June 30, 2022, with the option of 2 extensions for 1 year.

For Other: N/A

Renewal Date: 30 June 2022

Level of Care Information Age 18 & Over: High Intensity Treatment/FSP (caseload 1:12)

Level of Care Information Age 0- 17: N/A

TARGET POPULATION INFORMATION:

Target Population: The targeted population that is served at the MHS Fresno IMPACT program is adult and older adult consumers with dual diagnosis DSM V mental health and substance abuse disorders who are frequent users of crisis services, emergency rooms, detoxification services, released from conservatorship, jails and hospitals.

CORE CONCEPTS:

- **Community collaboration:** individuals, families, agencies, and businesses work together to accomplish a shared vision.
- **Cultural competence:** adopting behaviors, attitudes and policies that enable providers to work effectively in cross-cultural situations.
- **Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services:** adult persons served and families of children and youth identify needs and preferences that result in the most effective services and supports.
- **Access to underserved communities:** Historically unserved and underserved communities are those groups that either have documented low levels of access and/or use of mental health services, face barriers to participation in the policy making process in public mental health, have low rates of insurance coverage for mental health care, and/or have been identified as priorities for mental health services.
- **Integrated service experiences:** services for persons served and families are seamless. Persons served and families do not have to negotiate with multiple agencies and funding sources to meet their needs.

Please select core concepts embedded in services/ program:
(May select more than one)

Please describe how the selected concept (s) embedded:

Community Collaboration

Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services

Access to underserved communities

Integrated service experiences

Community Collaboration: MHS Fresno IMPACT has made efforts to leverage community partnerships such as Department of Veteran Affairs, Social Services Agencies, Probation, Payee Services Community Regional Medical Centers, United Health Centers, Fresno Community College, Faith-Based Agencies, Regency Properties, Central Valley Regional Center, Public Guardian, Board and Cares, BK Pharmacy, Foundation Laboratories, Medline Industries, the Independent Living Association, and HUD-funded housing programs to ensure access to the resources necessary for consumer wellness. During the 2020 – 2021 program year, 12.7% of consumers admitted to services received subsidized housing through MHSA funding to eliminate homelessness as a barrier to engagement and recovery. Subsidized residential treatment beds were provided to 13 persons served associated with MHS Fresno IMPACT through MHSA funding in addition to those consumers who were linked to residential treatment through alternative funding sources by case managers. MHS Fresno IMPACT continues to work with the Behavioral Health court to leverage clinical mental health services to actively assist in the reduction of recidivism for inmates with an SMI diagnosis. During the 2020-2021-year, 13 behavioral health court consumers were served through MHS Fresno IMPACT

Individual/Family-Driven, Wellness/Recovery/Resiliency-Focused Services: MHS Fresno IMPACT provides continuous training and staff development in evidenced-based recovery models including Motivational Interviewing, WRAP, Trauma Informed Care and Assertive Community Treatment. MHS Core Values (integrity, dignity, hope, excellence, innovation, and action) also reviewed weekly by the IMPACT program manager to assist with encouraging the mental wellness and recovery of the Fresno IMPACT staff members. The use of cross-training, case conceptualization, daily consultation and community collaboration interdisciplinary teamwork is facilitated amongst the staff. In collaboration with the individuals that we serve,

MHS Fresno IMPACT, provides an individualized treatment plan that is completed with a DBH credentialed Clinician (licensed and registered). The multidisciplinary services available to the individuals we serve are outlined based on their identified behavioral goals. Collateral information is encouraged from family members, when appropriate, during the assessment process to assist with providing relevant information for services. To increase evidenced based services provided, MHS Fresno IMPACT has certified two staff members as facilitators in Wellness and Recovery Plan (WRAP). A WRAP rehabilitation group is provided to the individuals we serve where they receive workbooks to work on individually or with clinical support. Clinical support can be fostered to assist with development of a strategic crisis plan for each of the individuals we serve participating in the WRAP rehabilitation group. Fresno IMPACT staff work collaboratively with the individuals we serve to develop a safety/crisis management plan to assist with fostering resiliency skills by utilizing current medications, support systems, and action planning for crises. Clinical staff provide regular assessments and plan of care review with the individuals we serve as behavioral goals are met or have been identified as ineffective by the individuals we serve.

Access to underserved communities: MHS Fresno IMPACT acknowledges the barriers faced by the individuals we serve that often interferes with their ability to seek out services in multiple locations. These barriers interfere with their ability to maintain basic functioning, stable living conditions as well as a reduction in psychiatric hospitalizations and incarcerations. Fresno IMPACT continues to work diligently to promote services within the communities of Fresno County who serve individuals who demonstrate the need for access to mental health services through a variety of outreach methods and partnerships. IMPACT maintains connections within the community on a monthly basis through outreach to Adult Services, Juvenile Justice, Behavioral health board, Committee for Promotion of Wellness, Fresno Madera Continuum of Care Suicide Prevention meetings, surrounding

universities to facilitate internships, community housing resources including private vendors and residential programs, and behavioral health court. All the individuals we serve are accepted to the Fresno IMPACT Program are assessed through the Urgent Care Wellness Center access team to ensure that the consumers with the lowest access, high acuity and/or utilization of mental health services such as frequent psychiatric hospitalizations are given priority access to the Dual Diagnosis FSP services. Historically, Fresno IMPACT continues to have a low denial rate for referrals to ensure that all of the individuals served within Fresno County are provided access to services regardless of previous history including low engagement in services, frequent hospital admissions, substance use and behavioral barriers. During the 2020-2021 program year there were no individuals denied services. During the 2010-2021 program year, 97.7% of referrals admitted to the program came from other mental health agencies and 2.3% of consumers admitted were referred through other county agencies.

Integrated Service Experiences: MHS Fresno IMPACT continues to provide services to families and consumers by utilizing Assertive Community Treatment principles including a multidisciplinary team of highly trained individuals in areas such as substance use, Peer Support, Psychiatry, Case Management, Dual Recovery, Housing, and Vocational Skill-building. To ensure that consumers have access to staff and individualized treatment the program maintains a consumer to staff ratio of 1:13. The staff works to lessen barriers to access and engagement in services and facilitate social integration by providing primarily field-based services. The program continues to make efforts to facilitate family engagement and inclusion using collateral psychoeducation and training to families through collateral services. During the 2020-2021 Program year [] billable minutes of collateral services were provided to the primary support persons to encourage strengths-based treatment and an alliance to support the needs and recovery of the consumer's served

PROGRAM OUTCOME & GOALS

- Must include each of these areas/domains: (1) Effectiveness, (2) Efficiency, (3) Access, (4) Satisfaction & Feedback Of Persons Served & Stakeholder
- Include the following components for documenting each goal: (1) Indicator, (2) Who Applied, (3) Time of Measure, (4) Data Source, (5) Target Goal Expectancy

Effectiveness (1) & Efficiency (2): Target goal was for this area was a 75% reduction in hospitalizations, incarcerations, homelessness and crisis episodes for persons served that have participated in treatment with Fresno IMPACT.

Indicator: Per DCR data, 43/109 participants experienced a psychiatric emergency prior to treatment, with that number being reduced to 12/109 within 1 year of treatment. This indicates a 72.1% reduction in psychiatric emergencies by Persons served after participating in treatment with Fresno IMPACT. There was also a 97.3% decrease in arrests, per DCR data.

Time of Measure: July 2020 – 30 June 2021.

Data Source: This data was provided by DCR/ITWS State System

Access (3): Target goal for this area was that IMPACT would provide services to 140 unique consumers.

Indicator: Per DCR data, MHS Fresno IMPACT engaged and provided services to 109 unique consumers from 1 July 2020 to 30 June 2021, with 90% of consumers remaining engaged in services for 6 months or more upon referral.

Time of Measure: 1 July 2020 – 30 June 2021

Who Applied: 109 unique consumers who were engaged in services 6 months or longer.

Data Source: This data was provided by DCR/ITWS State System.

Satisfaction (4) & Feedback of Persons Served & Stakeholder:

MHS Fresno IMPACT utilized the Fresno County Reaching Recovery database to create an individual recovery profile and to track consumer improvement and satisfaction of needs at intake and 6 months. The target goal expectancy was a significant increase in consumer functioning.

Indicator: Based on Reaching Recovery data, all 6 participants reported an increase in functioning and all 6 reported an increase in life satisfaction since entering treatment. More effort will be placed on surveying more persons served in hope that more responses will better represent satisfaction with IMPACT services.

Time of Measure: 1 July 2020 – 30 June 2021

Who Applied: 6 individuals for whom Reaching Recovery/Satisfaction Survey data was available.

Data Source: This data was obtained via Satisfaction Surveys given to persons served in September 2020.

DEPARTMENT RECOMMENDATION(S):
